HANDRAIL BELT

HANDRAIL BELT

Handrails are important components of escalators or moving sidewalks, mainly used for passengers to hold and increase safety and comfort while riding.

We fully consider the passenger's riding experience and highlight the quality advantages of durability, safety, stability, aesthetics, and fashion in technology and design, which can meet the needs of different brands of elevators.

A 2-YEAR WARRANTY IS JUST THE BEGINNING OF OUR SERVICE

Durable And Wear-resistant, A Reassuring Choice

Both aesthetics and practicality are emphasized, and high-quality materials are used to ensure that the product has better durability and stability during use, effectively extending its lifespan, reducing replacement frequency, and providing passengers with protection.

Safety And Stability, Quality Is King

We always adhere to high quality standards, ensuring that every inch of the handrail is carefully checked and designed with ergonomic and safety factors in mind. This not only provides high comfort and anti slip, but also effectively prevents passengers from accidentally slipping during the ride.

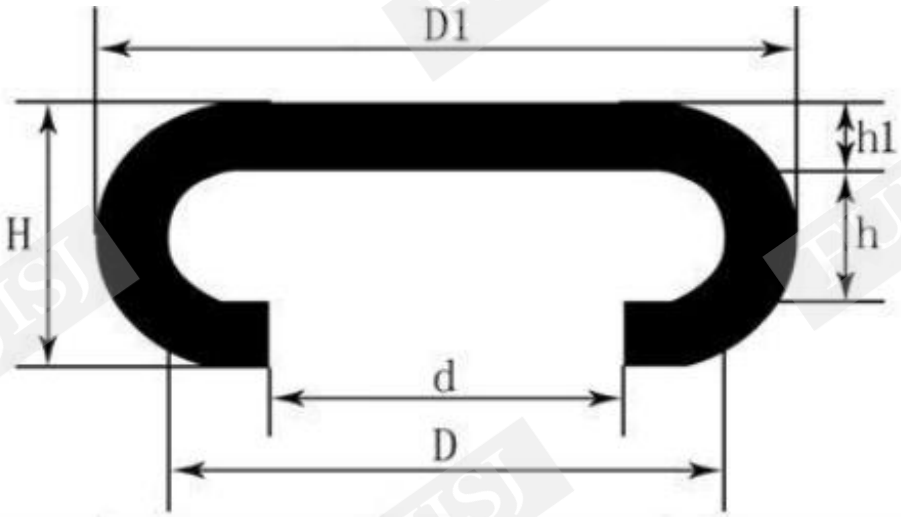
Beautiful And Fashionable, Enhancing Texture

Providing a variety of color options, the appearance is exquisite, not only enhancing the beauty of the escalator, but also perfectly matching with various decoration styles, enhancing the overall spatial texture, and meeting the needs of different scenes.

One Stop Service, Worry Free Experience

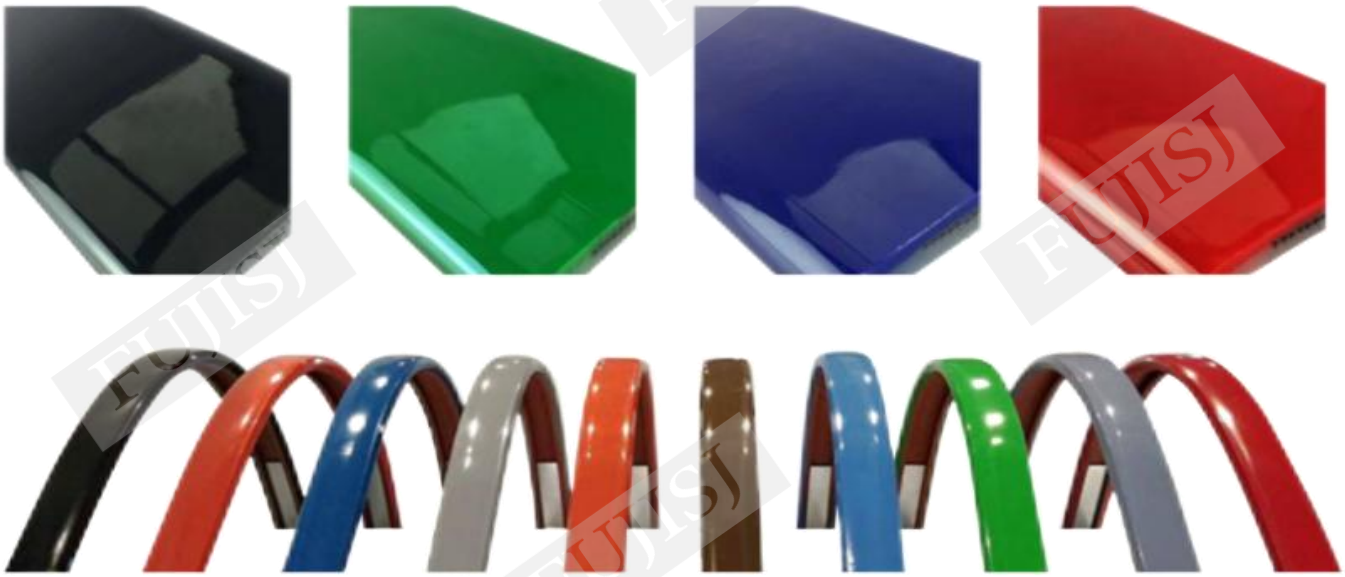
We provide comprehensive nanny style services, from product consultation, installation guidance to after-sales maintenance. Our professional team will track the entire process of service to ensure that products receive timely technical support and solutions during use. Worry free after-sales saves much time and energy.

WIDE RANGE OF APPLICATIONS



SPECIPICATION							
Type/Size/Code		Total High (H)	Inner High (h)	Top Thickness (h1)	Total Width (D1)	Inner Width (D)	Mouth Width (d)
Schindler	SDS	28.5±1	10.6±0.8	9.5±1	80±1	62±1	39^{+3}_{-1}
	SWE	34±1	12±0.8	12±1	82±1	62±1	33^{+3}_{-1}
Otis	OTIS-800	28±1	9.5±0.8	10±1	76±1	60±1	39^{+2}_{-1}
	OTIS	35.5±1	16.5±0.8	9.5±1	82±1	64±1	38^{+2}_{-1}
Mitsubishi	J	27±1	10±0.8	9.2±1	80±1	62±1	41
Hitachi	GRF	27.5	10.6±0.8	10±1	80±1	63±1	41^{+2}_{-1}
	GRF-1	31.7±1	11.5±0.8	10.4±1	82±1	63±1	40^{+2}_{-1}
GW	XF	35±1	14±0.8	12±1	82±1	64±1	35^{+2}_{-1}
LG	LG	33±1	12.5±0.8	12±1	82±1	63.5±1	39.5^{+2}_{-1}
Hyundai	W-BT2	30±0.5	12±0.5	$10^{+1}_{-0.5}$	80±0.5	64±0.5	$40^{+1}_{-0.5}$
	W-BT3	28.4±1	10.6±0.8	10.4±1	79.3±1	63.5±1	39.6^{+2}_{-1}
Fujitec	STD	28.5^{+0}_{-1}	$10^{+1.5}_{-0}$	10^{+0}_{-1}	80^{+0}_{-1}	63^{+2}_{-0}	40^{+2}_{-1}
Kone		$28.15^{+1.5}_{-1}$	10.6±0.5	9.2±1	$79.2^{+2.5}_{-0}$	$62.8^{+1.5}_{-0}$	$37.5^{+2.5}_{-0}$

VARIETY OF EXTERIOR COLORS



LONGER LASTING AND DURABLE MATERIAL

Coating

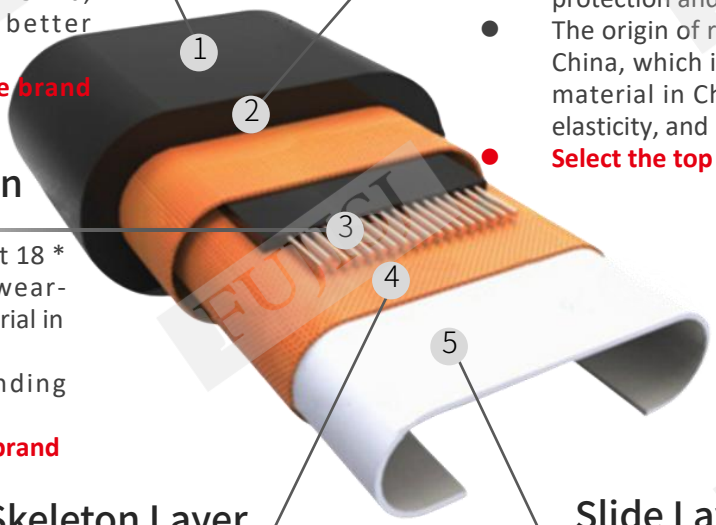
- Antioxidant, smooth, wear-resistant, and corrosion-resistant
- Adopting polysilazane (PSZ), which is the best antioxidant and anti-corrosion material in China, with higher cost and better quality
- **Select the top 5 Chinese brand products**

Face Glue

- SBR and CM combined with new process, with excellent fire prevention, UV protection and anti-aging performance
- The origin of rubber comes from Hainan, China, which is the highest grade rubber material in China, with better stability, elasticity, and better adhesion
- **Select the top 3 Chinese brand rubber**

Steel Wire Curtain

- Steel wire combination at 18 * 9s, which is the most wear-resistant and tensile material in China
- Better tensile and bending fatigue resistance
- **Select the top 3 Chinese brand wire rope**



Skeleton Layer

- Use the most stable material in China: Nylon polyester blended fabric
- Overlay technique, more suitable hardness and stronger tensile resistance
- **Select the top 5 Chinese brand products**

Slide Layer

- Use high-strength nylon fabric, which is the thickest, toughest, and most wear-resistant material in China, with greater friction and wear resistance
- Provide customized canvas and polyester short fiber materials
- **All select the top 3 Chinese brand products**

THOUGHTFUL CUSTOMIZED SERVICES

Nylon Fabric

Feature

Friction is suitable for
Moderate noise
Widely used

Recommended Use

Suitable for any general indoor or outdoor escalator, with steel structure and aluminum alloy guide rails.

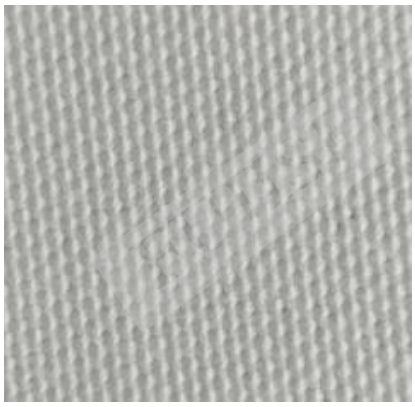
Canvas

Feature

High frictional force
High noise level
High strength and durability

Recommended Use

Heavy load, stainless steel, aluminum alloy, galvanized guide rails.



Polyester short fiber

Feature

Low friction
Low noise
Strong winding ability

Recommended Use

An environment with low load and low noise requirements, allowing for arbitrary guide rails.

We provide flexible product customization services to design and produce personalized products according to your special needs, while also providing professional technical guidance to ensure product quality and effectiveness.

COMPLETE TESTING EQUIPMENT

Tensile testing machine

Aging testing machine

Handrails fatigue testing machine

Ozone aging resistance testing machine

Rubber hardness tester

Rotorless vulcanizer

Curved and cracked testing machine

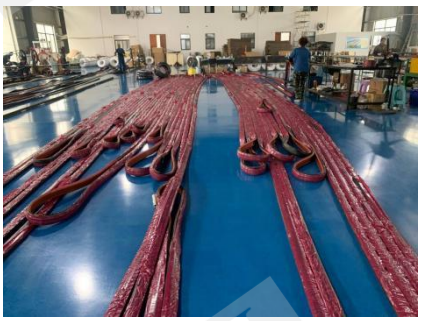
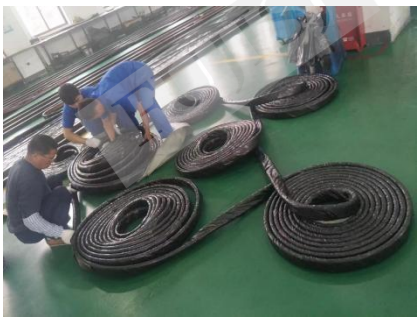
FACTORY SHOW





OUR SERVICE

01 **Service Hotline**

We provide a global service hotline to provide you with professional and meticulous consulting services.

Technical Support **02**

We have a global professional team that provides you with comprehensive technical support and solutions according to your requirements.

After-sale Service **03**

We have a professional service team that can provide on-site installation guidance services and handle customer complaints in a timely manner.

If the product you need is in stock, we will prepare the goods within 24 hours and ship them. If you need customized products, please confirm the delivery time with us. **04** **Stocking Period**

Transportation Services

We transport our products to various parts of the world through transportation methods such as land, sea, and air. **05**
