Power Amplifier Switching Unit [4 Primary, 4 Standby]

VT-9004

Functional description:

1. Features automatic fault detection and automatic switching capabilities.
2. You can manually switch between the primary and backup amplifiers.
3. Features four fully independent channels, each capable of automatically switching between primary and backup amplifiers.
4. Can connect to 4 main amplifiers and 4 backup amplifiers.

Technical specifications:

Model	VT-9004
Switching capability	150V/20A, Audio Signal
Input signal	10KΩ 0.775V (0dB), unbalanced
Input Detection Threshold	20mV, detection fime constant 100mS
Output Detection Threshold	50mV, detection fime constant 20mS
Inspection Cycle	500 milliseconds, with 6 cycle inspections
Power Supply	AC 220V ± 10% 50-60Hz
Dimensions	89×483×366 mm
