52-Slot Receiver Unit Charging Case

VM-7000D

Functional description:

1. Unique luggage exterior design featuring independent dual-color charging indicator lights with dynamic display;
2. Features an internationally compatible power supply with input voltage: AC 100V–240V, 50/60Hz;
3. Each charging station can simultaneously store, transport, and charge up to 52 infrared receiver units.
4. The red light flashes during charging and turns solid green when fully charged. Features built-in charging protection.
5. Charging time is 2-3 hours, featuring three-level anti-static and lightning protection technology;

Technical specifications:

Power Supply	AC110V-220V
Power	66W
Number of charging solts	24
Maximum charging current per unit	220mA
Charging time	Approximately 2 ~ 2.5 hours
Status Indicator	Red light on - Charging in progress Green light - Charging complete
Operating Temperature	0-40℃
Dimensions (W × D × H)	630x370x290mm
Weight	10.5 kg (excluding battery)
