

UPKTECH RC-050XL-TN Standard PCB Filter

I. Product description

This unit allows good and bad board separation in AOI ,during testing,the good board can continue to run without interruption.

II. Features

1. Reject, inspect and pass through modes provided
2. Modular design
3. Stable enhanced by 'robust design
4. Inducing multi-zone position accuracy
5. Ergonomic design,make arms rest
6. Different lengths available upon request
7. Muti-zone concept available upon request
8. Variable speed control
9. SMEMA interface

III. Specification

Technical Parameters	
Description	This unit allows good and bad board separation in AOI ,during testing ,the good board can continue to run without interruption
PCB size	50*50-330*250-530*460
Belt type	Antistatic oblate belt
Conveyor speed	0.5-20M/min or customer specefied
Power supply	AC1P110V/220V
Power	Max 300VA
Storage plate number	8 pcs(or specify)
Storage plate distance	4-6bar,10ltr/min max

Transport height	900±20mm(Or customized)
Transport direction	From left to right or right to left

IV. Operation diagram
