

UPKTECH RHHT-720 Cut Led Lights Strips Cutting Machine

I. Description

This equipment uses 2 sets of upper and lower blades for cutting tasks.

II. Features

1. Due to the multiple cuttings, the cutting process is very stable, which greatly improves the positioning ability of the V-CUT slot, even the circuit board with very shallow V-CUT slot, there will be no V-CUT slot out of the guide cutters, finally avoiding defective products coming.
2. Due to the small cutting force of the blade and the use of Germany imported high-speed steel material, the durability of the blade is greatly improved, and the service life can last more than one year when dividing the aluminum substrate.
3. The tip of the cutter will not run out for more than 0.02mm, to ensure with a perfect cutting quality.
4. Simple operation, high production speed.
5. Stainless steel platform with laser scale positioning is customized for additional equipped (length with 1.2m or 2.4m is available).
6. The round cutters from above and below can be precisely adjusted.
7. The round cutters can be sharpened many times and reused.
8. The baffle can be customized to facilitate the slitting of different widths.
9. The X and Y axis can be adjusted freely to improve the slitting accuracy to the maximum.

Room 207, Building 2, No. 5, Yangchong Industrial Zone,
Songgang Street, Bao'an District, Shenzhen, Guangdong Province, China

III.Specification

Model/Name	ASC-720
Host Size	380×325×333
Platform Size	2400×360× 190
Host Weight	Approx 44 KG
Working Voltage	220V/50Hz (110V/60Hz)
Pressure	None
Shear Speed	80, 120, 200, 600mm/s
V-cut Thickness	0.6-3MM
Power	60W
Shear Length	Unlimited
Blade Size	DIA 60
Blade Qty	6 pieces
Compatible	Strip Board such as Glass fibre Board, Alumimum board, ,etc
