发明专利技术：双拼进纸工艺
Invention Patent Technology: Double Sheets Feeding Craft

博系列可实现一机两用，既能解决小幅面纸张无法生产大袋面纸袋的难题，又可作为单张纸袋机使用，为用户节省制袋前期设备投入超2000万。
采用整机智能全伺服功能， 换版效率较传统双拼机型提升60%，双拼与单张功能换规10分钟。
本设备采用自动贴头卡，可选配穿绳功能，全面覆盖奢侈品包装袋、高端精品袋等各类加工场景。

The S series can realise one machine with dual-use, not only it can solve the issue of small width paper's inability to produce large bag width paper bags, but it can also be used as a single sheet paper bag machine, saving the client more than USD 3million in initial bag manufacturing equipment costs.
The entire machine is equipped with an intelligent full servo function, and size-changing efficiency has increased by 60% compared to the traditional model, single/double sheets function interchange only takes 20 minutes.
This equipment can do top card auto-pasting, rope inserting is an optional function. This machine can handle any manufacturer, including luxury paper bags and high-end boutique paper bags.
