## SELF-PROPELLED SPRAYING ROBOT

### Product Description

This multifunctional equipment is designed for chemical weeding, foliar fertilization, and pest control in agriculture, animal husbandry, and forestry. It supports remote control operation, ensuring personnel safety by keeping them away from pesticide exposure. The equipment features adjustable nozzles for excellent spraying performance. The air-blast spraying system provides wide coverage, while the tracked design adapts to various complex terrains, including mountains, slopes, and sandy areas, with flexible and convenient stepless speed adjustment.

### Performance Characteristics

#### ◆ Nozzle Features

Individual switches, adjustable angles, and adjustable spray volume.

#### ◆ Fully remote-controlled

Stepless speed adjustment, on-the-spot turning with automatic braking, durable industrial-grade remote control, and a range of over 200 meters.

#### ◆ Stable driving

Extended track design with low-pressure anti-slip functionality.

Product Parameters

Project name	unit	Details
Dimensions	mm	1750*1090*1080
Travel Speed	m/min	0-80
Pump Pressure	Mpa	1.0-4.0
Tank Capacity	L	300
Single-side Spray Width	m	4-5
Spraying Method	/	Air-blast Type
Number of Nozzles	↑	10
Weight	kg	340
