

# Product Data Sheet

## Corrosion Inhibitor UBDill-CI-1641

### Introduction

---

- Corrosion Inhibitor UBDill-CI-1641 can be used in the oil and gas exploration, refining and recycling of water treatment process.
- This product has outstanding features: Good effect, economic, simple preparation, low toxicity, environmental pollution, Non-ionic surfactant, soluble in water, excellent performance etc.
- It can be completely dissolved in organic solvents such as aromatic hydrocarbons and xylene;

### Typical Physical Properties

---

Items	Specification
Appearance (@20°C)	Amber
Solubility (@25°C)	Oil soluble
Specific gravity (20°C)	0.85 -0.915 g/cm <sup>3</sup>
Solid content (@105°C, 4h)	≥ 20%
pH	7.0 ± 1.0
Flash point (Closed)	≥61°C

### Application

---

- It can be applied in oil production, transportation

### Recommended Handling

---

- Contact with skin and eyes should be avoided. Exposures should be washed with large amounts of water.

### Packaging and storage

---

- The product is packed in 208 L plastic drums. It can also be packed according to user's requirements. This product should be transported according to the routine chemical products, not forced impact; products should be placed in ventilated, cool and dry warehouses, away from fire sources.
- Shelf Life: The product is valid for one year.
