

1. DS014V

Item name: DS014V 12V-24V color screen voltmeter

Short description:

DS014V new appearance 12V-24V color screen voltmeter for trucks

1.Color digital display

2.12-24V universal

3. IP65 waterproof

4.Reverse Connection Protection

DS014V new appearance 12V-24V color screen voltmeter for trucks

Specification:

Net Weight: 30g

Material: PC、ABS

Body color: Black、silver

Power Input: DC 12V-24V

DS014V, the latest innovation in voltage monitoring for trucks. With its new appearance and advanced features, this 12V color screen voltmeter is designed to provide accurate and reliable voltage readings for a wide range of applications.

Featuring a vibrant color digital display, the DS014V offers clear and easy-to-read voltage measurements, allowing users to monitor their electrical systems with precision. Its 12-24V universal compatibility makes it suitable for a variety of vehicles, including trucks, ensuring that users can rely on it for their

voltage monitoring needs.

One of the standout features of the DS014V is its IP65 waterproof rating, providing protection against water and dust ingress. This makes it ideal for use in outdoor and rugged environments, where reliable voltage monitoring is essential. Additionally, the reverse connection protection ensures the safety of both the device and the vehicle's electrical system, giving users peace of mind when using the DS014V.

Whether it's for professional truck drivers, fleet managers, or automotive enthusiasts, the DS014V offers a valuable tool for maintaining optimal electrical performance. Its durable construction and user-friendly design make it a practical and essential addition to any vehicle's dashboard.

In conclusion, the DS014V sets a new standard for voltage monitoring with its colorful display, universal compatibility, waterproof construction, and reverse connection protection. It's the perfect solution for anyone in need of a reliable and accurate voltmeter for their truck or vehicle. With the DS014V, users can stay informed about their electrical systems and ensure smooth and efficient operations on the road.

Product Name	12V-24V color screen voltmeter
Input Voltage	12V-24V
Operating Temperature	-25°C ~+60°C
Material	PC、ABS
Terminal type	2 Pin Terminals
Illuminated or not	Yes
Housing color	Black&silver
Accessories	Nut
