### **Introduction:**

Introducing the versatile and convenient 22MM Universal Motorcycle Handlebar ON OFF Headlight Control Switch with USB Car Charger. This aftermarket replacement part is designed to enhance your riding experience by providing a seamless way to control your lights and charge your devices on the go.

Equipped with a 5V-2A USB port, this handlebar switch allows you to conveniently charge your mobile devices while riding. The output voltage of 12V ensures a reliable power supply for your USB devices. The black wire serves as the negative pole of the USB, while the red wire functions as the positive pole, ensuring a secure and stable charging experience. With a total of 4 wires, including red, green, black, and white, this switch offers versatile functionality for various applications.

In addition to its USB charging capabilities, this handlebar switch can be used to control general-purpose lights, hazard lights, fog lights, headlights, and power sockets for mobile devices. The white and green wires serve as switch wires, providing a convenient way to toggle between different lighting options while on the road.

Furthermore, this handlebar switch comes with a 55cm extension cord, allowing for flexible installation and easy access to the switch and USB port. The soft rubber waterproof cover ensures durability and protection against the elements, making it suitable for use in various weather conditions.

Whether you're a commuter or a long-distance rider, this handlebar switch offers the convenience and functionality you need to stay connected and in control while on the road. Upgrade your motorcycle with the 22MM Universal Motorcycle Handlebar ON OFF Headlight Control Switch with USB Car Charger and experience the convenience of seamless lighting control and device charging during your rides.
