Working voltage: 12-24V

Motorcycle Radio Player 5V 3.4A Dual USB Charger with Voltmeter and ON/Off Switch Handlebar Mounting Phone Charger Power Adapter

Specification:

Product Advantages:

* **【Dual USB Charger】** : Motorcycle phone charger with independent power switch, 2 USB ports to charge your camera, phone and GPS device while riding. 5V 3.4A per port, charge two devices at the same time. You can enjoy long journeys without worrying about running out of battery on your device. It is powerful and easy to use.

* **【Material】**: This USB mobile phone charger socket is made of ABS environmentally friendly material, flame retardant and high temperature resistant, 3.4A super high current, faster and safer charging. With a cable length of 55.1 inches, it's long enough to connect to the battery. In addition, it has a charging switch, you can directly turn the switch on whenever you want to charge.

* **【Waterproof Cap】**: The charging port and switch are covered by a lid, making it perfectly suitable for outdoor travel in all weathers. When you are not using it, you can close the cap to keep the USB port away from rain and dust. If there is heavy rain, turn off the switch and make sure the USB charging port is dry the next time you use it.

* **【LED Digital Voltage Display】**: The voltmeter shows the voltage of the vehicle's battery. You will know the health of your battery while driving to prevent safety issues caused by a broken battery. The device's indicator light allows you to quickly and easily find the charging port in the dark, guaranteeing safe and reliable charging.

* **【Two Way for Installation】**: The wiring length is 132cm, long enough to reach the battery. There are two mounting methods, which can be used as long as it is fixed to the handlebar or mirror. Fully compatible with all USB interface electronics. Suitable for smartphones, digital cameras or GPS. This motorcycle phone charger can meet any of your needs

Please Note:

The voltmeter does not display when the cigarette lighter is in use.

Wiring Connection:

- The red wire is connected to the positive terminal of the battery.

- The black wire is connected to the negative pole of the battery.

It can supply power to two electronic devices at the same time such as mobile phones, tablets, and GPS. It can also be used for car refrigerators, vacuum cleaners and so on.

With this phone charger, you can solve these problems:

- **Mobile phone GPS positioning and navigation software consumes power fast.**
- **The charging port is not enough, multiple devices cannot be charged at the same time.**
- **Lighters forgotten at home or it is too windy outside.**
