DS034M motorcycle handlebars

DESCRIPTION:

DS037M Motorcycle Modified with Aluminum Alloy Lamp, Red LED Rocker switch, Second Gear Switch motorcycle handlebars

Product features:

1. Install switches for easy control and installation
2. Made of aluminum alloy, it is resistant to high temperatures and has excellent performance
3. Extra long wire length, sufficient wire length to ensure wiring issues
4. Adopting a unique process, the surface color is vibrant and colorful, enhancing product hardness and reducing wear and tear

DS037M Motorcycle Modified with Aluminum Alloy Lamp, Red LED Rocker switch, Second Gear Switch motorcycle handlebars

This innovative product is designed to enhance the performance and control of your motorcycle, providing a seamless and efficient riding experience.

The key features of this modification kit include the installation of switches for easy control and installation. The switches are strategically placed to ensure convenient access and seamless operation while riding. Additionally, the use of aluminum alloy in the construction of the lamp, red button, and second gear switch ensures high temperature resistance and excellent overall performance. This guarantees durability and reliability, even in challenging riding conditions.

Furthermore, the kit comes with an extra-long wire length, providing sufficient wiring to eliminate any potential installation issues. This ensures a hassle-free installation process and allows for flexibility in customizing the setup according to individual preferences. The unique process used in the manufacturing of the product results in a vibrant and colorful surface, enhancing the product's hardness and reducing wear and tear. This not only adds to the aesthetic appeal but also contributes to the longevity of the components.

In summary, our motorcycle modification kit offers a combination of practicality, durability, and aesthetic appeal. It is designed to meet the needs of motorcycle enthusiasts who seek to enhance the performance and control of their bikes. With its high-quality materials and thoughtful design, this kit is a valuable addition for anyone looking to customize and optimize their riding experience.

Experience the difference with our motorcycle modification kit and elevate your riding experience to new heights.

Product name	DS034M motorcycle handlebars
Model	DS037M
material	Aluminum alloy & plastic
Size	4.2*3.3*5.8cm
current	10A
Vlotage	12V
Power	120W
Led color	Blue/Red
Weight	80g
