1.DS8010   12/24V Dual USB Charger LED Digital Display Voltage Amp Gauge Ammeter Voltmeter

Short description:

DC12-24v/0.1-10A Dual LED Digital Mtimeter Amp Voltage Meter 2-in-1 Current Tester and Voltage Tester for Boat

Type:Digital Ammeter
Rated: DC 12-24V
LED Color: Red,blue
Material: ABS
Size: 36.5*36.5*50.3mm

DC12-24v/0.1-10A Dual LED Digital Mtimeter Amp Voltage Meter 2-in-1 Current Tester and Voltage Tester for Boat

The DS8010 DC12-24v/0.1-10A Dual LED Digital Multimeter is a versatile and essential tool for boat owners. This 2-in-1 current tester and voltage tester provide accurate readings to monitor the state of your battery, making it easy to determine whether it is fully charged or discharged. The meter features easy-to-read LED segments and can be easily connected to your 12-volt system, providing convenience and reliability for boat owners.

One of the key features of the DS8010 Dual LED Digital Multimeter is its ability to monitor the storage-battery voltage with a reverse connection protection function, ensuring that the line will not be burnt. This feature adds an extra layer of safety and protection for your boat's electrical system. Additionally, the meter allows you to timely grasp the state of the battery voltage, making it a valuable tool for maintaining the health of your boat's electrical system. Moreover, its voltage measurement capabilities can also be used for other products, adding to its versatility and usefulness.

The DS8010 Dual LED Digital Multimeter is designed for universal application, making it suitable for all cars, motorcycles, and other universal models. This wide compatibility ensures that boat owners can use this meter for various vehicles and electrical systems, making it a practical and cost-effective investment. Whether you are a seasoned boat owner or a novice enthusiast, having the DS8010 Dual LED Digital Multimeter on board will provide you with the peace of mind and confidence to monitor and maintain your boat's electrical system effectively.

In conclusion, the DS8010 Dual LED Digital Multimeter is a valuable tool for boat owners, offering accurate readings and versatile applications. Its easy-to-read LED segments, reverse connection protection function, and wide compatibility make it an essential addition to any boat's toolkit. With its ability to monitor battery voltage and current, this multimeter provides the convenience and reliability that boat owners need to ensure the smooth operation of their electrical systems.

Product Name	12/24V Dual USB Charger LED Digital Display Voltage Amp Gauge Ammeter Voltmeter
Model Number	DS8010
Size	36.5*36.5*50.3mm
Housing Color	Black
Input Voltage	DC12-24V
Measure voltage	6-33v
LED color	Red,blue,orange
Measure current	0~10A
Operation Temperature	-40℃ to +70℃

Note: If you need other needs, welcome to send us an enquiry!
