Description:

Introducing the Cigarette Lighter USB Charger Socket Cable Harness Cable, the perfect solution for powering your mobile devices. Whether you're in a car, motorcycle, ATV, RV or boat, this versatile charger has you covered.

The Cable Wire Harness Connector Cord is available in a choice of 60cm or 30cm cable lengths, giving it the flexibility to meet your specific installation requirements. The cable is made of high-quality ABS plastic and pure copper, ensuring durability and reliable performance in a variety of environments. Red and black color coding makes it easy to identify positive and negative connections, simplifying the installation process.

The Cable Wire Harness Connector Cord is equipped with a 10A fuse that provides overload and short-circuit protection, giving you peace of mind when charging your devices. A built-in cigarette lighter socket and USB charger allow you to power multiple devices simultaneously, making it a convenient and practical accessory for a vehicle or boat setup.

The DSA01 is also compatible with the DSA02 and integrates seamlessly with other accessories in the DSA series. This compatibility makes it easy to expand and customize your charging setup to meet your specific power requirements.

Whether you're modifying your vehicle, upgrading your boat's electronics, or just looking for a reliable charging solution for your outdoor adventures, the Cigarette Lighter USB Charger Socket Cable Harness Connector is the ideal choice. Its versatility, durability, and safety features make it a must-have accessory for anyone who needs reliable power on the go.

Choose the Cable Wire Harness Connector Cord for a reliable, efficient charging solution and experience the convenience of powering your devices wherever your adventures take you.
