

Item name: IB-AF6/8 6-hole or 8-hole rocker switch panel

Specification :

IB-AF6/8 6-hole or 8-hole rocker switch panel can be freely combined with various submarine switches or boat switches for submarine cars and yachts

Color: Black

Material: ABS, Aluminium Plate

hole count: 6/8 hole

IB-AF6/8 6-hole or 8-hole rocker switch panel can be freely combined with various submarine switches or boat switches for submarine cars and yachts

When it comes to outfitting submarine cars and yachts with the latest marine switches and rocker switches, the 6-hole or 8-hole rocker switch panel is a game-changer. Crafted from durable ABS and aluminum plate materials, this panel offers a sleek and reliable solution for assembling various submarine switches or boat switches. Whether you're a marine enthusiast or a professional in the industry, this versatile panel is designed to meet your specific needs.

The 6-hole or 8-hole rocker switch panel is designed for seamless integration, allowing for the free combination of submarine switches and boat switches. Its black color and sturdy construction make it a perfect fit for marine environments, ensuring durability and longevity. With the ability to accommodate 6 or 8 holes, this panel provides flexibility in customizing the marine switch and rocker switch assembly according to individual requirements. Whether it's for navigation lights, bilge pumps, or any other marine electrical application, this panel offers a reliable and efficient solution.

In addition to its functional benefits, the 6-hole or 8-hole rocker switch panel exudes a sleek and professional aesthetic. Its clean design and high-quality materials make it a standout addition to any submarine car or yacht. The combination of ABS and aluminum plate not only ensures durability but also adds a touch of sophistication to the overall marine switch assembly. Whether you're upgrading an existing vessel or outfitting a new one, this panel is a must-have for achieving a modern and efficient electrical

system.

In conclusion, the 6-hole or 8-hole rocker switch panel is a versatile and essential component for submarine cars and yachts. Its ability to freely combine with various submarine switches or boat switches makes it a valuable asset for marine enthusiasts and professionals alike. With its durable construction, flexible hole count, and sleek design, this panel offers a reliable and stylish solution for marine electrical applications. Whether it's for functionality or aesthetics, this panel is a top choice for elevating the electrical systems of submarine cars and yachts.
