IB-ATA03 Anderson Insulation Dust Cover

DESCRIPTION:

IB-ATA03 Anderson connector insulated dust cover 50A/120A/175A/350A lithium battery plug charging

Product features:

1. Strong toughness, tight installation, anti falling, impact resistant, flame retardant, suitable for high-intensity work
2. Good sealing effect, preventing dust from entering, waterproof and dustproof
3. Complete specifications and multiple colors to choose from
4. The surface is smooth and free of burrs, and installation and use do not harm hands

IB-ATA03 Anderson connector insulated dust cover 50A/120A/175A/350A lithium battery plug charging

Introducing our Anderson Connector Insulated Dust Cover, designed for high-intensity work and built to withstand tough conditions. With a range of features to ensure durability and reliability, this product is the ideal choice for your lithium battery plug charging needs.

First and foremost, our dust cover is constructed with strong toughness, ensuring a tight installation that is resistant to falling and impact. This makes it suitable for demanding work environments where durability is essential. Additionally, the dust cover is flame retardant, providing an extra layer of safety in hazardous conditions.

Furthermore, our product boasts a good sealing effect, effectively preventing dust from entering and ensuring waterproof and dustproof protection for your connectors. This feature is crucial for maintaining the integrity and performance of your equipment, especially in outdoor or industrial settings.

In terms of versatility, our dust cover comes in complete specifications and offers multiple colors to choose from. This allows you to select the most suitable option for your specific requirements or to color-code your connectors for easy identification and organization.

Lastly, the surface of our dust cover is smooth and free of burrs, ensuring that installation and use do not cause harm to your hands. This attention to detail reflects our commitment to providing a user-friendly and safe product for our customers.

In conclusion, our Anderson Connector Insulated Dust Cover is a reliable and durable solution for protecting your connectors during charging and ensuring the longevity of your equipment. With its robust construction, effective sealing, versatility, and user-friendly design, this product is the perfect choice for demanding applications.

Product name	IB-ATA03 Anderson Insulation Dust Cover
Model	IB-ATA03
Housing Color	Red/Black
material	silica gel
Temperature	105 °C
Ampere	50A/120A/175A/350A
Features	Wear resistance, high temperature resistance
Application areas	automobiles, lithium batteries,etc
