

Item name: IB-P1101 2 Gang Rocker Switch Panel with 3.1A USB Charger Voltmeter

Specification :

IB-P1101 2 Gang Rocker Switch Panel with 3.1A USB Charger Voltmeter 12V-24V DC Rocker Switch 15A circuit breaker button switch

Material: ABS+Aluminum

Working temperature: -25 degrees to 80 degrees

Working voltage: 12v-24v

Output voltage: 12v/20a, 24v/10a

IB-P1101 2 Gang Rocker Switch Panel with 3.1A USB Charger Voltmeter 12V-24V DC Rocker Switch 15A circuit breaker button switch

Output voltage: 12v/20a, 24v/10a

Maximum cigarette lighter current: 15a

Voltmeter: Measuring range: 6-30v

USB charging port output: 5v 3.1a (2.1a+1.0a)

Function: switch + cigarette lighter socket + double usb port voltmeter

Optional switch: used for led light bar, spotlight

Switch system: waterproof closed rocker switch

Are you looking to upgrade your vehicle's electrical system for better monitoring and maintenance of your battery health?

Look no further than the 2 Gang Rocker Switch Panel with 3.1A USB Charger Voltmeter. This versatile panel not only features a 3.1A USB charger for convenient device charging but also includes a voltmeter for real-time monitoring of your battery voltage. With a DC voltmeter range of 12-24V and reverse polarity protection, this switch panel is designed to help you maintain your battery's health and extend its lifespan.

The inclusion of a 15A circuit breaker button switch provides added safety and protection against short circuits, ensuring that your electrical system remains secure. The panel's anti-reverse and short circuit protection further enhances its reliability, giving you peace of mind while using it to monitor and maintain your battery's health. By providing real-time detection of battery voltage and state, this switch panel empowers you to take proactive measures to ensure that your battery operates within its normal voltage range, ultimately contributing to the longevity of both your battery and engine.

Proper maintenance of your vehicle's battery is crucial for its overall performance and longevity. By investing in a 2 Gang Rocker Switch Panel with 3.1A USB Charger Voltmeter, you can take control of your battery's health and ensure that it operates optimally. With its user-friendly design and essential features, this switch panel is a valuable addition to any vehicle, offering convenience, safety, and the ability to monitor and maintain your battery with ease. Don't wait any longer to enhance your vehicle's electrical system - make the switch to this advanced panel today and enjoy the benefits of improved battery maintenance and longevity.

Rocker Switch:

Loop Circuit	ON-OFF
Maximum power	240W
Input voltage	DC12V / 24V
Protection class	IP65

Operating Temperature	-25°C -80°C
-----------------------	-------------

Dual USB Port:

Working voltage	12-24V
Output current	3.1A
Output voltage	5V
LED Light	Blue

Cigarette Lighter Socket:

Working voltage	12-24V
Output voltage	12-24V
LED Light	Blue

Product name	Marine Boat Rocker Switch Panel
Product model	IB-P1101
Size	154*110*50mm
Certificate	CE,Rohs,CQC,IEC
IP rate	IP65
Rate	12V/24V
Application	12V -24V Cars, Bus, Marine, off-road vehicles etc.
Mechanical life	100000 cycles
Type	SPST (Single pole single throw)
Output voltage	5V DC
Switch type	ON-OFF Rocker Switch
Material	ABS+PC Fireproof Material
