

Item name: IB-P1201 8 Gang Switch Panel for Car Boat Marine

Specification :

IB-P1201 12V 24V Rocker switch 3.1A Dual USB Socket Voltmeter Cigarette Lighter LED light 8 Gang Switch Panel for Car Boat Marine

Certificate: CE/ROHS approved

Material: ABS PC Aluminum

Color: Black

LED Color: Blue

Product Dimension: (9.25x4.72x3.54)inch/ (23.5x12x9)cm

IB-P1201 12V 24V Rocker switch 3.1A Dual USB Socket Voltmeter Cigarette Lighter LED light 8 Gang Switch Panel for Car Boat Marine

IP Rating: IP65

Fuse: 15A

Switches Available: fog light, spot light, side light, roof light, zombie light, driving light, etc

Rocker Switch: 8

Input Voltage: DC 12V/20A, 24V/10A

Digital Voltmeter Range: 6V - 30V

Cigarette Socket:12V/ 24V

Operating Temperature: -13° F~176° F/ -25 ° C ~ 80 ° C

Dual USB Charger Socket:

Input: DC 12-24V

Output: DC 5V 2.1A, 5V 1A

Are you looking for a versatile and reliable switch panel to control electrical equipment in your vehicle or marine vessel? Look

no further than the 8 Gang Switch Panel. This IP65 waterproof panel is designed to withstand the rigors of both land and sea, making it the perfect addition to your car, boat, or marine craft. With 8 LED illuminated marine grade rocker switches, this panel is not only functional but also aesthetically pleasing. The switches come with vehicle and marine labels, making it easy for DIY installation and use.

In addition to the rocker switches, the panel features dual USB charging ports with DC 5V/1A and 5V/2.1A outputs, allowing you to conveniently charge your phones, tablets, cameras, GPS devices, wireless headphones, and more. The inclusion of a voltmeter ensures that you can monitor the voltage of your vehicle or marine battery at all times. Furthermore, the panel includes a 12V/24V cigarette lighter and 4 external 15 amp fuses, providing protection from over-heating, over-currents, overcharging, and short circuits. This comprehensive set of features ensures that your electrical equipment is not only easily controlled but also protected from potential damage.

Whether you're a car enthusiast, a boat owner, or a marine adventurer, the 8 Gang Switch Panel is a must-have accessory for your vehicle or vessel. Its durable construction, versatile functionality, and user-friendly design make it an essential component for any electrical system. Upgrade your vehicle or marine experience today with the 8 Gang Switch Panel and enjoy the convenience and

peace of mind it brings to your journeys on the road or the water.

Product name	8 Gang Switch Panel for Car Boat Marine
Material	ABS Panel
Input	12v-24V
Output	3.1A USB Charger
Switch Function	On-OFF,5Pin ,dual led
Waterproof Grade	IP66
Weight	680g
Product Name	8 Gang Switch Panel
Output Voltage and current	12V 20A/24V 10A
Size	23.9*11.9cm

Usage

Cars, off-road vehicles, buses, RVs, yachts, boats, etc.
