

Item name: IB-P801 8 Gang Aluminum Rocker Switch Panel

Product description:

IB-P801 8 Gang Aluminum Rocker Switch Panel Toggle Dash 5 Pin ON/Off for Automotive Car Marine Boat RV

Input Voltage: DC 12V/20A, 24V/10A

Operating Temperature: -13°F~176°F/ -25 °C ~ 80 °C

Rocker Switch: 8

IP Rating: IP65

IB-P801 8 Gang Aluminum Rocker Switch Panel Toggle Dash 5 Pin ON/Off for Automotive Car Marine Boat RV

IP Rating: IP65

Material: ABS+PC+Aluminum

Color: Black

LED Color: Blue (can produce red or green colors)

Used for Automotive Car Marine Boat RV

Are you looking to upgrade your automotive, marine, boat, or RV with a versatile and reliable switch panel? Look no further than the 8 Gang Aluminum Rocker Switch Panel Toggle Dash 5 Pin ON/Off. This switch panel is designed for those who want to customize their vehicle's electrical

system with ease. The DIY feature allows you to personalize the panel with the included sign stickers, making it a perfect fit for your specific needs.

Installation is a breeze with this switch panel. It comes pre-wired, simplifying the process and saving you time. All you need to do is fix it into the designated hole using the provided screws. The flexibility of the installation allows for horizontal or vertical placement, ensuring that it can seamlessly integrate into your vehicle's dashboard or control panel. With its blue aluminum illuminated rocker switches, this panel not only adds functionality but also a touch of modern style to your vehicle.

Safety is a top priority when it comes to electrical components, and this switch panel delivers on that front as well. It is equipped with multi-protection features, including safeguards against over-heating, over-current, overload, and short circuits. This ensures the longevity of the panel and the safety of your vehicle's electrical system. Additionally, the panel operates at both 12V and 24V, providing versatility for use in various vehicle types.

In conclusion, the 8 Gang Aluminum Rocker Switch Panel Toggle Dash 5 Pin ON/Off is a must-have for anyone looking to enhance their vehicle's electrical system. Its DIY customization, easy installation, and multi-protection features make it a reliable and stylish choice for automotive, marine, boat, and RV applications. Upgrade your vehicle today with this high-quality switch panel and experience the convenience and safety it brings to your driving experience.
