

Item name: IB-P809 5 Gang Control Boat Rocker switch Panel

Product description:

IB-P809 5 Gang Control Boat Rocker switch Panel 12V-24V Waterproof RV Caravan Marine Blue LED Rocker Switch

Material Description:High quality ABS

Installation:Pre-wired

Rocker Switch:5

Breaker:5(15A x 5)

Loop Circuit:ON-OFF

Switch System: Water-resistant enclosed Rocker switch

IB-P809 5 Gang Control Boat Rocker switch Panel 12V-24V Waterproof RV Caravan Marine Blue LED Rocker Switch

Rating:DC 12V 20A,24V 10A

electric Strength:AC 1500V 1minute

Operating Temperature:-25 degree to 80 degree

Electrical Life:10000 make and break cycles at full load

IP Rating:IP65

Input voltage: 12V-24V

12V 20A DC

24V 10A DC

Switch: 5PIN ON-OFF-speed dual-band blue light switch harness * 5

USB output port: 5V / 1A * 1,5V / 2.1A * 1, blue lights indicate

Voltmeter: 1, red lights
With dust cover * 2

Are you looking to upgrade your vehicle's control and safety features? Look no further than the 5 Gang Control Boat Rocker Switch Panel. This 12V-24V waterproof panel is designed for use in RVs, caravans, and marine vehicles, providing a convenient and efficient way to manage various electrical components. The blue LED rocker switches not only add a stylish touch to your vehicle's interior but also offer easy visibility, even in low-light conditions. With this switch panel, you can effortlessly control different functions, such as lighting, pumps, and other accessories, making it a must-have for any vehicle enthusiast. Fits for DC 12/24V car, boat, marine, motorcycle, ATV, RV etc. This USB Socket is suitable for charging Phone, Pad, android tablets, power banks, video games controllers, sports watch etc.

In addition to its control capabilities, this switch panel also features a 12V 24-volt USB outlet with the ability to charge two compatible devices simultaneously, up to 4X faster than conventional charging. This means you can keep your essential devices powered up while on the go, ensuring you stay connected and prepared for any situation. The panel also includes a blue LED voltmeter that monitors the vehicle's battery and electrical system, automatically indicating the car voltage on the screen. This feature provides valuable insight into your vehicle's power status, allowing you to take proactive measures to maintain its

performance and safety.

Furthermore, the 12V USB Car Outlet is certified by UL CE & ROHS, offering peace of mind with over-load, over-current, and short circuit protection to ensure charging safety. This level of protection is essential for safeguarding your devices and vehicle from potential electrical hazards, making it a reliable and secure addition to your vehicle's electrical system. With its combination of control, convenience, and safety features, the 5 Gang Control Boat Rocker Switch Panel is a versatile and practical solution for enhancing your vehicle's functionality and overall driving experience.

In conclusion, the 5 Gang Control Boat Rocker Switch Panel offers a comprehensive solution for managing electrical components in your vehicle, while also providing convenient charging capabilities and safety features. Whether you're an avid traveler, marine enthusiast, or simply looking to upgrade your vehicle, this switch panel is a valuable addition that combines style, functionality, and peace of mind. With its durable and waterproof design, along with its advanced features, this switch panel is a worthy investment for anyone seeking to optimize their vehicle's control and safety.

Product Name	5 Gang Control Boat Rocker switch Panel
Feature	Waterproof
LED Color	Blue / Red / Green(or White/Orange)
LED Voltmeter	Blue Light / Without LED
Material	Aluminum alloy + PVC / ABS
Input Voltage	DC 12V-24V
Output Voltage	DC 3.6-6.5V/3A, 6.5V-9V/2A, 9V-12V/1.5A
Product Dimension	1.45 x 1.92 inches
Max Output	36W
Wire Connector / Wire soldering	Acceptable and with fast shipping
Accessories	Nut, Rubber ,Waterproof Cover
