

IB-SP101 50A/120A/175A Anderson series Plug Mounting Panel with Dust Cover

IB-SP101-The Anderson Series socket DC12-24V is equipped with dust cover for RVS, yachts, etc.The connector panel mount is made of high quality material and is resistant to high temperatures.

- Enhanced Safety: The dust cover protects the connector from dust and damage, ensuring safety.
- Secure Connection: The recessed plate design provides a stable connection, minimizing accidental disconnections.
- Extended Lifespan: The dust cover extends the lifespan of the connector and system, reducing maintenance needs.
- Convenient Accessibility: The dust cover allows easy access to the connector for quick connections.
- High Performance: The connector offers efficient power transfer and supports hot plugging.

IB-SP101-The Anderson Series socket DC12-24V is equipped with dust cover for RVS, yachts, etc.The connector panel mount is made of high quality material and is resistant to high temperatures.

Type: This socket panel is specifically compatible with Anderson Power SB175 Series Connectors, ensuring a secure and reliable connection. Use for caravan camper boat truck, high-end large-scale transportation tools, such as ships, yachts, motorhomes and buses.

Specification:

Rated Current: 50/120/175AMP

Voltage: 600V

Operating Temperature: -20° to 105°

Rated: DC 12-24V

Color: Black

Material: Plastic

Size: 4.33 x 3.35 x 2.95 inches

Weight: 7.2 ounces

Introducing the 50A/120A/175A Anderson series Plug Mounting Panel with Dust Cover, a reliable and efficient solution for ensuring the safety and longevity of your electrical connections. This innovative product features a dust cover that provides protection from dust and damage, safeguarding the connector and ensuring safe and reliable operation. The recessed plate design further enhances the stability of the connection, minimizing the risk of accidental disconnections and providing peace of mind in various applications.

With the inclusion of the dust cover, this product extends the lifespan of the connector and the entire system, reducing maintenance needs and enhancing overall efficiency. This not only saves time and resources but also ensures consistent performance over an extended period. Additionally, the dust cover allows for easy access to the connector, facilitating quick and hassle-free connections, making it an ideal choice for applications where efficiency and convenience are paramount.

The 50A/120A/175A Anderson series Plug Mounting Panel with Dust Cover is designed to offer efficient power transfer and supports hot plugging, making it suitable for a wide range of industrial and commercial applications. Whether it's for power distribution, equipment connections, or other electrical needs, this product provides a reliable and durable solution that meets the demands of various environments.

Overall, this product combines the essential features of safety, durability, and convenience, making it an indispensable component for electrical systems. Its robust construction and reliable performance make it a valuable addition to any setup, ensuring that your electrical connections are secure, efficient, and built to last. With the 50A/120A/175A Anderson series Plug Mounting Panel with Dust Cover, you can trust that your electrical connections are in good hands.

Product Name	Anderson series Plug Mounting Panel
Type	Plug Mounting Panel
Model Number	IB-SP101
Size	4.33 x 3.35 x 2.95 inches
What You Got	How much current is needed for the socket?
