

## **IB-SP801 Electronic 12V switch board 4 group panel**

The new electronic combination panel includes Anderson socket voltmeter for real-time voltage safety protection circuit display, while equipped with switches fully functional and equipment safety

- 1、 Upgrade Design: Added a more widely used usb c interface. Pd type c power delivery 2.0 socket can provide quick charging speed for devices. Qc 3.0 usb charging port efficiency is 4 times quicker than ordinary chargers.
- 2、 Smaller Size: Compared with other similar products with led voltmeters, we designed the meter to be between the gc3.0 12v usb and usb c to show the real-time status of the vehicle battery voltage at a glance.
- 3、 Safer Material: Most 12v switch panel is abs material panel design. We designed it with aluminum panels, heat dissipation, safety for use, scratch-proof, and corrosion-resistant. IP65
- 4、 Waterproof: The rocker switch button has been rigorously tested for IP65 water resistance test, the pre-wired also built-in 15a fuse, and overload protection.
- 5、 Suitable for Anderson Power SB50 Series connector.

**The new electronic combination panel includes Anderson socket voltmeter for real-time voltage safety protection circuit display, while equipped with switches fully functional and equipment safety**

**Specification:**

Rated Current: 50AMP

Voltage: 600V

Operating Temperature: -20° to 105°

Rated: DC 12-24V

Color: Black

Material: Plastic

Size: 148\*105\*78mm

Weight: 386G

Introducing our latest innovation in electronic switch panels - the 12V switch board with USB car charger and cigarette lighter control panel. This new installation panel is designed to provide convenience and efficiency for all your electronic needs while on the go. Featuring a more widely used USB-C interface, this switch board is equipped with a PD type C power delivery 2.0 socket, providing quick charging speed for your devices. Additionally, the QC 3.0 USB charging port offers an impressive 4 times quicker charging efficiency compared to ordinary chargers, ensuring that your devices are powered up in no time.

One of the standout features of this switch board is the inclusion of LED voltmeters, setting it apart from other similar products on the market. This allows for easy monitoring of the voltage, ensuring that you are always aware of the power status of your devices. Constructed with a durable ABS material panel design, this 12V switch panel is built to withstand the rigors of everyday use. The rocker switch button has undergone rigorous testing for IP65 water resistance, providing peace of mind in various weather conditions. Additionally, the pre-wired design includes a built-in 15A fuse for added safety and protection.

Whether you're on a road trip, camping adventure, or simply need to power up your devices in your vehicle, our 12V switch board with USB car charger and cigarette lighter control panel is the perfect solution. With its versatile functionality and robust design, it's the ideal companion for any electronic setup in your vehicle.

Experience the convenience and reliability of our electronic switch panel - the ultimate solution for all your on-the-go power needs.

Product Name	Electronic 12V switch board 4 group panel
Type	7 Position
Model Number	IB-S801
Size	148*105*78mm
Housing Color	Black
Led Color	Blue
Voltage	DC 12-24V
<b>What You Got</b>	How much current is needed for the socket?
