Specification:

Made of high-quality materials, the shell is sturdy, not easy to break, has strong durability, stable performance, sensitive response, and can be used for a long time
Easy to install:Just pry the old switch out with a skateboard,pull out the plug from the old switch,connect the new switch to the wire harness,and then mount it to the bezel bracket

Precision manufacturing, all products have undergone rigorous testing before leaving the factory, in order to provide you with the best user experience

The window switches for the front seats of a car can be classified into the following types:

1. Manual Switches: These require physical effort to operate, typically by turning a knob or pushing a lever.
2. Electric Switches: Controlled electronically, often with buttons or touch-sensitive surfaces.
3. Integrated Switches: Integrated into the door panel or armrest for a seamless and aesthetic look.
4. Master Control Switches: Allow the driver to control all the windows of the vehicle, including those of the front and rear seats.
5. Passenger-Specific Switches: Located on the passenger side door and only control the window on that side.

how to replace a car window switch:

First, gather the necessary tools such as screwdrivers, plastic pry bars or flat-head screwdrivers.

Next, remove the interior light cover around the switch. Use the appropriate tool to carefully pry or remove it. Start from the edge or gap and lift it up slowly.

Then, disassemble the switch assembly. Depending on the specific vehicle model, you may need to remove the screws or clips that secure the switch assembly. In some cases, you might need to lift the switch handle first and then unplug the power connector.

After that, install the new switch. Insert the new switch assembly into the original position and make sure it is firmly installed. Connect the power connector properly.

Once installed, test the new switch to ensure the window can move up and down normally.

Finally, reinstall the interior light cover and make sure it is firmly in place.

It should be noted that the steps for replacing the window switch may vary depending on the vehicle model. Before proceeding, it is recommended to refer to the vehicle's user manual or look for the specific repair guide for your model to obtain more detailed and accurate steps. Also, if you are unsure about your ability to perform the operation, it is advisable to consult a professional automotive technician or go to an automotive repair shop for the replacement.

Product Name	Passenger window switch
Items	IY-010

Warranty	12months
Certificate	ISO9001
Packing	Neutral Packing
Application	Front passenger for Auto car
Condition	100% Brand New!

Note: If you need other needs, welcome to send us an enquiry!
