Following is only for your reference, and the toggle switch is only for illustrative purposes, it is not included.

KN-45C Different Color Carbon Switch Toggle Safety Cover Aircraft Flip Safety Toggle Switch Cover Guard

These aircraft/pilot/missile style protective covers will fit atop standard ON/OFF and (ON) /OFF toggle switches (SPST and DPST).

These covers are designed to fit atop standard ON/OFF metal bat-handle toggle switches.

Enhanced protection

These flip covers are designed to fit atop metal toggle switches. Not only do they protect you from accidental switching, aircraft-style flip covers add a unique look to your switches.

Easy to use

A spring-loaded mechanism holds the covers in either open or closed positions until a force is applied. An open cover allows the switch to be flipped ON. Closing the cover forces the switch to the original OFF position.

Easy to install

To install, insert the toggle handle through the aircraft cover's mounting hole and then screw on the toggle switch nut.

For panels: Mount the toggle switch from beneath, place the flip cover overtop, and then screw the nut firmly in place.

Standard fit

Thread Diameter: 12mm / 0.47", Size: 47 x 28 x 20mm / 1.9" x 1" x 0.8", Weight: 15g / 0.5 ounces.
