### **WNA-A11 Automotive car Parts LED light on-off DC12V 3A Dual ford Switch for Toyota**

#### **Specification:**

Product name: Dual ford switch

Operating Voltage: 12-24 Volts

Current: 3Amp

Terminal: Button

Actuator Type: Button

Control Method : Touch

Material: ABS+COPPER

Size: 39\*24\*58mm  
operation Mode: Auto, Electric  
Color: Black  
Led color: Red/blue/green/yellow  
Socket: 5pin  
Logo: engrave

### **Introduction:**

This high-quality switch is the perfect solution for enhancing the functionality and aesthetics of your car.

With its perfect compatibility, this switch is suitable for most Toyota car models, ensuring a seamless integration into your vehicle's existing setup. The easy installation process allows for a hassle-free upgrade, as it must be wired through a fused relay and directly replaces the OEM switch. The switch is rated at 3Amp 12V and comes with a connector wire kit, making it incredibly easy to install.

The switch features a symbol laser etched directly onto the switch face, ensuring a long image life. Additionally, it is equipped with a blue LED light, adding a stylish and modern touch to your car's interior. The LED light not only enhances the visual appeal but also provides a clear indication of the switch's status.

Crafted from premium ABS material, this switch is built to withstand the rigors of daily use, ensuring maximum strength and durability for long-lasting usage. Its robust construction guarantees reliable performance, making it a dependable addition to your vehicle's interior.

Whether you're looking to replace a worn-out switch or upgrade your car's interior with a sleek and functional accessory, the Automotive LED Light On-Off Switch is the ideal choice. Elevate your driving experience with this high-performance switch that combines practicality, style, and durability. Upgrade your Toyota car with this premium switch and enjoy the convenience and sophistication it brings to your driving experience.
