WNB012 battery modification switch

DESCRIPTION:

WNB012 350A Blue Ocean Battery Modification Isolation Switch Yacht RV Red Heavy Duty Power Main Switch

Product features:

1. Dual circuit enhancement, capable of switching between two isolated battery packs simultaneously
2. High current, widely used in large engineering vehicles, ships, etc
3. Customizable according to needs
4. Flexible installation

WNB012 350A Blue Ocean Battery Modification Isolation Switch Yacht RV Red Heavy Duty Power Main Switch

This innovative product offers a range of features that make it a versatile and reliable choice for switching between isolated battery packs.

With its dual circuit enhancement, this isolation switch is capable of seamlessly switching between two isolated battery packs simultaneously. This feature ensures a smooth and efficient power transfer, making it ideal for use in large engineering vehicles, ships, and other heavy-duty applications where high current is required.

One of the key advantages of the 350A Blue Ocean Battery Modification Isolation Switch is its high current capacity, which makes it suitable for a wide range of demanding environments. Whether it's powering a marine vessel or a heavy-duty vehicle, this switch is designed to deliver reliable performance under challenging conditions.

Furthermore, this isolation switch is customizable according to specific needs, allowing for tailored solutions to meet individual requirements. This flexibility makes it a versatile choice for a variety of applications, ensuring that it can be adapted to suit different power management setups.

In addition to its advanced functionality, the 350A Blue Ocean Battery Modification Isolation Switch is designed for flexible installation, making it easy to integrate into existing power systems. This user-friendly approach ensures that the switch can be seamlessly incorporated into new or existing setups with minimal hassle.

Overall, the 350A Blue Ocean Battery Modification Isolation Switch offers a combination of high performance, flexibility, and ease of installation, making it a top choice for those seeking a reliable and efficient power main switch for their yacht or RV.

Product name	WNB012 battery modification switch
Model	WNB012
material	Plastic and brass
Size	10.3*10.3*8.7cm
current	200A
Voltage	32V
temperature	-40°C ~ 85°C
Product Life	1000 times
Weight	500g
