WND1014 busbar junction box

**DESCRIPTION:**

WND1014 New Purple Copper Busbar 48V 600A High Current RV Ship Modification Busbar Positive and Negative Pole Connection Box

Product features:

1. Junction box design, easy to summarize and organize
2. Made of glass fiber, resistant to high and low temperatures
3. 600A high current, can be used in DC power sources such as cars, RVs, and yachts
4. Stainless steel bolts are not easy to rust

**WND1014 New Purple Copper Busbar 48V 600A High Current RV Ship Modification Busbar Positive and Negative Pole Connection Box**

This innovative junction box is designed to provide a convenient and efficient solution for organizing and summarizing electrical connections in high current DC power sources such as cars, RVs, and yachts.

Crafted with high-quality materials, this busbar features a durable glass fiber construction that is resistant to both high and low temperatures, ensuring reliable performance in various environmental conditions. The use of purple copper material enhances conductivity and ensures efficient power transmission, making it an ideal choice for high current applications.

The 600A high current capacity of this busbar makes it suitable for handling heavy electrical loads, providing a reliable and stable connection for power distribution. Whether it's for vehicle modifications, marine applications, or other electrical systems requiring high current capabilities, this busbar is designed to meet the demands of modern power distribution needs.

The junction box design of the busbar allows for easy organization and management of electrical connections, simplifying installation and maintenance processes. Additionally, the stainless steel bolts used in the construction of the busbar are resistant to rust, ensuring long-term reliability and durability.

With its robust construction, high current capacity, and user-friendly design, the New Purple Copper Busbar 48V 600A High Current RV Ship Modification Busbar Positive and Negative Pole Connection Box offers a reliable and efficient solution for electrical connections in a wide range of applications. Whether you're a professional installer or a DIY enthusiast, this busbar provides the performance

and convenience needed to streamline electrical installations and ensure reliable power distribution.

Product name	WND1014 busbar junction box
Model	WND1014
Housing Color	Red/Black
material quality	red copper
current	600A
Vlotage	48V
Application area	RVs and yachts
interface type	Wire
Weight	618g
