

### 3, WND1021

WND1021 circular terminal block

#### DESCRIPTION:

WND1021 Automotive Electronic Accessories 300A High Current Busbar RV Retrofit Busbar Circular Multi way Copper Bar Wiring Post

Product features:

1. Dust cover design to avoid safety hazards
2. Different specifications and colors to choose from
3. Using glass fiber, it has good flame retardant resistance
4. Screw fixation, simple wiring method

#### **WND1021 Automotive Electronic Accessories 300A High Current Busbar RV Retrofit Busbar Circular Multi way Copper Bar Wiring Post**

These high-quality terminals are designed to provide a safe and efficient solution for high current busbar applications in RVs and other vehicles. With a 300A capacity, these round terminals are built to handle the demands of modern automotive electrical systems.

The round terminals feature a unique dust cover design, ensuring the safety of the electrical connections and preventing any potential hazards. This innovative feature sets our round terminals apart from traditional busbars, providing an added layer of protection for both the vehicle and its occupants.

One of the key advantages of our round terminals is the availability of different specifications and colors, allowing users to choose the right terminal for their specific needs and preferences. Whether it's a particular size requirement or a color preference for easy identification, our round terminals offer versatility and customization options.

Constructed using high-quality glass fiber, our round terminals exhibit excellent flame retardant resistance, providing peace of mind in the event of any electrical faults or malfunctions. This ensures that the terminals can withstand high temperatures and maintain their integrity under challenging conditions.

Installation and wiring are made simple with the screw fixation method, allowing for a secure and reliable connection. This user-friendly design streamlines the installation process, saving time and effort for both professional installers and DIY enthusiasts.

In conclusion, our round terminals are a reliable and efficient solution for high current busbar applications in automotive electronics. With their innovative design, customizable options, and robust construction, these terminals are the ideal choice for retrofitting busbars and wiring posts in RVs and other vehicles. Trust in the quality and performance of our round terminals for all your automotive electronic accessory needs.

Product name	WND1021 circular terminal block
Model	WND1021
Housing Color	Red/Black
material quality	red copper
current	300A
Voltage	48V
Application area	RVs and yachts
interface type	Wire
Weight	172g
