

第一部分：

WNF-B0804A 4 Way Fuse Block for 12/24V Marine Truck Vehicle

第二部分

Short description:

WNF-B0804A 4 Way Circuit Blade Fuse Block Box for 12/24V Marine Truck Boat Car

1. Product Name : Fuse block
2. Input Voltage: 12V-24V DC
3. Quantity of Fuse Slots: 4
4. Maximum of 30 Amp per circuit and 100 Amp per panel.

Other type with different combination: WNF-B0808A

第三部分

The 4 Way Circuit Blade Fuse Block Box for 12/24V Marine Truck Boat Car is an essential component for protecting the electrical systems of vehicles and marine vessels. This fuse block is designed to accommodate blade fuses and serves as a circuit protector, ensuring the safety and functionality of the electrical circuits.

The fuse block is a 4-way system, meaning it can accommodate up to four individual blade fuses. This allows for the protection of multiple circuits within the vehicle or marine vessel, providing a comprehensive safeguard against electrical faults and overloads. The versatility of this fuse block makes it suitable for a wide range of applications, from trucks and cars to boats and marine equipment.

One of the key features of this fuse block is its compatibility with 12/24V systems. This makes it suitable for use in both standard automotive applications as well as in marine environments where 24V systems are commonly used. The ability to support different voltage systems adds to the versatility and practicality of this fuse block, making it a valuable component for various types of vehicles and vessels.

In addition to its functional benefits, the fuse block is designed with durability and reliability in mind. Constructed from high-quality materials, it is built to withstand the rigors of automotive and marine environments, including exposure to moisture, temperature fluctuations, and vibrations. This ensures that the electrical circuits remain protected even in demanding conditions, providing peace of mind to vehicle and vessel owners.

Overall, the 4 Way Circuit Blade Fuse Block Box for 12/24V Marine Truck Boat Car is an essential component for anyone looking to protect their vehicle or marine vessel's electrical systems. With its 4-way design, compatibility with 12/24V systems, and durable construction, it offers a reliable and versatile solution for safeguarding electrical circuits. Whether used in a truck, car, boat, or other marine equipment, this fuse block provides essential circuit protection for a wide range of

applications.

Product Name	4 Way Fuse Block
Input Voltage	12V-24V DC
Max Voltage	32V
Quantity of Fuse Slot	4 Way
Fuse Type	ATC or ATO
Material	ABS
Terminal type	Screw
Illuminated or not	Yes
Led	Red
Accessories	Cover, screws
What You Get	1X Fuse Block with cover and screw
