0/2/4 Gauge AWG in Line ANL Fuse Holder with 250 Amp Fuse for Car Audio Truck DIY

Features:

The fuse is heat-resistant, durable and has good electrical conductivity

The fuse holder is heat-resistant, flame-retardant, insulating, safe and reliable

Suitable for 0/2/4 gauge wire

Can be used for audio in cars, trucks, boats, etc., or other high current products to prevent excessive current from damaging appliances

The 0/2/4 gauge AWG in-line ANL fuse holder with 250 amp fuse is a reliable and durable solution for protecting your car audio setup. With its sturdy construction and compatibility with different gauge sizes, this fuse holder provides versatility and peace of mind. The included 250-amp fuse provides ample protection against surges and short circuits, ensuring your audio system remains safe and operational at all times. Whether you're installing a new amplifier or upgrading an existing setup, this fuse holder is a must-have for any car audio enthusiast.

When it comes to installation, the 0/2/4 size AWG in-line ANL fuse holder with 250 amp fuse is designed for ease and convenience. Its push-in design integrates seamlessly into your existing wiring, while the clear housing provides visibility of fuse status for quick inspection. Additionally, compatibility with different form factors makes it a versatile choice for a variety of car audio setups. Whether you're an experienced installer or a DIY enthusiast, this fuse holder provides you with a user-friendly experience, ensuring your audio equipment connections are safe and secure.

In summary, the 0/2/4 Gauge AWG Inline ANL Fuse Holder with 250 Amp Fuse is the best choice for anyone looking to protect their car audio system. With its rugged construction, compatibility with different gauges and ease of installation, this fuse holder provides peace of mind and reliability to every car audio enthusiast. When it comes to protecting your investment and ensuring the longevity of your audio equipment, choosing the right fuse holder is crucial, and this product helps in every way.

Product Name	Fuse holder
Model	WNF-D503
Connector Type	Screw

Mounting Type	Through-Hole Mount
Current Rating	30Amps-400 Amps
Other display features	Wireless
Gauge	4.0
Voltage	32V
Product Dimensions	5.67 x 2.2 x 1.65 inches
Material	Acrylonitrile butadiene styre, Zinc
Fuse Holder Type	ANL fuse
