WNF-H501 Waterproof 5*20mm Car Inline Fuse Holder

第二部分

Short description:

WNF-H501 Waterproof 5*20mm Car Inline Fuse Holder with 5A/10A/15AMP Fuse Tap

- 1. Fit for Fuse : 5 x 20mm; Voltage:250V;Current : 6.3A**
- 2. Wire Type : 22 AWG**
- 3. Customize is available**
- 4. Heavy Duty Fuse Holders, Protecting circuits and electrical equipment.**

第三部分

WNF-H501 Waterproof 5*20mm Car Inline Fuse Holder with 5A/10A/15AMP Fuse Tap

WNF-H501 Waterproof 5*20mm Car Inline Fuse Holder is a heavy-duty solution designed to safeguard electrical systems in various automotive applications. This fuse holder is specifically engineered to accommodate 5 x 20mm fuses and operates at a voltage of 250V with a current rating of 6.3A. Its heavy-duty construction ensures durability and reliability, making it an ideal choice for automotive electrical protection.

The WNF-H501 fuse holder is equipped with a 22 AWG wire type, providing a secure and stable connection for the fuse. This ensures that the electrical circuit is effectively protected from overloads and short circuits. Additionally, the waterproof feature of the WNF-H501 makes it suitable for use in challenging environments where exposure to moisture or water is a concern. This level of protection ensures the longevity and performance of the fuse holder, even in harsh conditions.

Customization options are available for the WNF-H501, allowing for tailored solutions to meet specific automotive electrical requirements. This flexibility makes it a versatile choice for a wide range of applications, providing peace of mind for vehicle owners and installers. Whether it's for a standard automotive electrical system or a custom modification, the WNF-H501 can be adapted to suit individual needs, making it a practical and adaptable solution for automotive electrical protection.

The heavy-duty design of the WNF-H501 fuse holder ensures that it can effectively protect circuits and electrical equipment from potential damage. Its robust construction and high-quality materials make it a reliable choice for demanding automotive environments. With the ability to accommodate 5 x 20mm fuses and a range of current ratings, the WNF-H501 offers a comprehensive solution for safeguarding automotive electrical systems, providing essential protection for both the vehicle and its occupants.

In conclusion, the WNF-H501 Waterproof 5*20mm Car Inline Fuse Holder is a heavy-duty and waterproof solution that prioritizes the protection of automotive electrical systems. Its durable

construction, customizable options, and waterproof feature make it a practical choice for a wide range of automotive applications. Whether it's for standard installations or custom modifications, the WNF-H501 offers a reliable and adaptable solution for safeguarding vehicle electrical systems.

Product Name	Inline Fuse Holder
Cable Size	18 AWG
Country of Origin	China
Mounting Type	Surface Mount
Rated Current	20A
Material	Glass, Plastic
OEM	Available
Fuse size	5*20mm
What You Get	1X Inline Fuse Holder
