

SAFETY PROTECTION SERIES

Everything serves your needs

FACTORY PROFILE

Lianyungang Sonice Industry Co, Ltd. is a professional manufacturer and exporter of safety protection products

The company's main products include safety helmets, goggles, safety vests, work clothes, safety shoes, safety gloves etc. We currently have over 800 employees, 20 production lines, and 15 years of production experience.

The factory covers an area of 6000 square meters and has various machines and raw materials, which can meet different customization requirements and provide relevant product certificates. Currently, approximately 80% of our sales come from ODM and OEM orders. The annual export volume reaches \$10 million dollars.

BRAND STORY

SONICE, as a safety glove manufacturing factory, was established in 2012,

At first we only produced mechanical gloves, because of the increasing demand from our customers we added the production line of impact gloves, cut resistant gloves.

One day a VIP customer said to me: Roland, I need to deal with different suppliers from head to toe, it's very hard, it would be great if you can help me with sourcing. At first I didn't care about it, until the second customer mentioned the same need to me.

At that time, I made up my mind to be the one-stop purchasing center in PPE industry, and today,

SONICE has done it!

OUR PARTNERS

At Sonice industries, we take pride in our service and experience. Our professional team will help you determine which of our wide range of products is best suited to your needs and provide you with the optimal solution

A photograph of two male workers in a factory environment. They are both wearing yellow hard hats and high-visibility green safety vests over blue polo shirts. The worker on the left is holding a clipboard and a pen, and both are smiling and looking at the clipboard. The background shows industrial machinery and pipes.

- 7 Safety Work Shoes

SAFETY HELMET

Helmets are protective equipment for the head, worn by military personnel during training and combat, and are an indispensable tool in people's transportation. Helmets are used in military, construction, mining, and other sports such as American football, cycling, baseball, racing, motorcycles, etc.

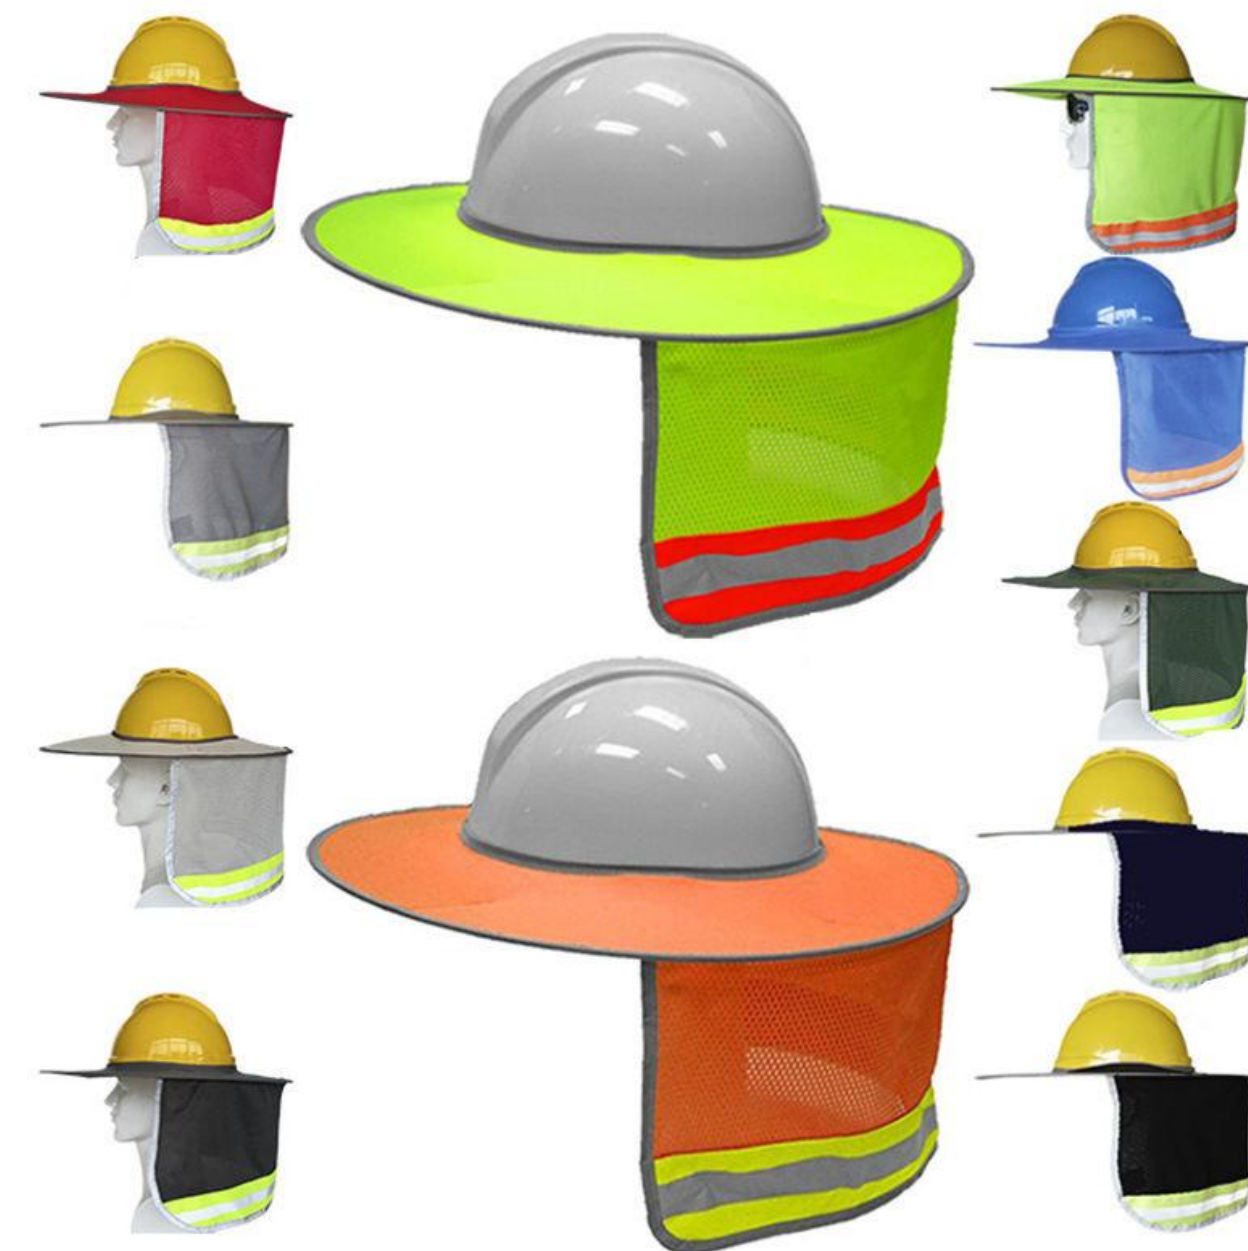

SH001

- Material:** ABS safety helmet
- Colors:** Fluorescent yellow, white, red, yellow
- Usage:** Building construction, steel industry

SH002

- Material:** ABS plastic
- Colors:** yellow, red, blue, white, customizable colors
- Usage:** construction sites, industrial transportation, steel handling, inspection and supervision of mining

SH003

- Material:**100% polyester plain fabric+mesh fabric
- Colors:** 11 colors available, including fluorescent yellow, fluorescent orange, and wine red
- Usage:** sunscreen, sunshade, eye protection, neck sunburn prevention, outdoor construction, road maintenance

SH004

Material: HDPE, ABS plastic

Colors: yellow, red, blue, white

Usage: Automotive services, architecture, petroleum industry, railway maintenance, steel industry, electrical maintenance

SH005

Material: HDPE, ABS plastic

Colors: yellow, red, blue, white

Usage: Automotive services, architecture, steel industry, petroleum industry, railway maintenance, electrical maintenance

SH006

Material: ABS+knitted fabric

Colors: red, yellow, blue, white

Usage: Building construction, steel industry

SH007

Material: PP+PE resin+ABS resin

Colors: white, yellow

Usage: Purpose: Ground management to avoid disasters, prevent typhoons from falling objects, and provide temporary emergency response for business trips

SH008

Material: PP+PE resin+ABS resin

Colors: Blue, yellow, red, orange, white

Usage: Purpose: Ground management to avoid disasters, prevent typhoons from falling objects, and provide temporary emergency response for business trips

A male and a female scientist in a laboratory setting. The male scientist on the left is wearing a white lab coat, a blue surgical mask, and clear safety goggles. The female scientist on the right is also wearing a white lab coat, a blue surgical mask, and clear safety goggles. She is using a microscope. In the foreground, there is a rack of test tubes containing blue liquid. The background shows blue laboratory cabinets.

PROTECTIVE GLASSES

Goggles can effectively block foreign objects from coming into contact with the eyes. Both sides of the goggles are generally widened with protective wings, which have a good barrier effect against foreign objects such as sandstorms and splashed liquids.

FP001

Material: PC (polycarbonate)

Color: red, yellow, blue, customizable

Usage: Anti fog

Function: 99% UV protection

FP002

Material: PC (polycarbonate) lenses

Color: Transparent lenses, black frame

Usage: outdoor cycling, splashes, sports protection

Function: Impact resistant, scratch resistant, splash resistant, wind and sand resistant, UV resistant

FP003

Material: PC+PP, mirror foot rubber

Color: Transparent lenses, customizable frame color

Usage: Dust prevention, outdoor cycling, splashes

Function: Anti wind and sand, impact, high transparency

FP004

Material:	Glass lenses
Color:	black, white, tan, gray
Usage:	Electric welding, polishing, welding, mechanical processing, decoration and transportation, and other places
Function:	Anti wind and sand/anti impact/adjustable, not easy to scratch, preventing splashing

FP005

Material:	PC (polycarbonate)
Color:	Lens color mixed color, frame color black
Usage:	Marking machine, beauty instrument, X-ray operation, welding work
Function:	Anti glare, eye protection, anti splash, anti UV, anti impact, laser protection

FP006

Material:	PC (polycarbonate)
Color:	Lens color mixed color, frame color black
Usage:	Welding work, operating X-rays, high-temperature furnaces, lasers
Function:	Anti light radiation, anti dust, anti UV, anti splashing, anti impact,

FP007

Material:	PC (polycarbonate)
Color:	Lens+Frame Transparent
Usage:	Skiing, cycling, chemical experiments
Function:	Wind, sand, dust, mist, etc

FP008

Material:	PC (polycarbonate)
Color:	Colorful lenses, black, gray, white
Usage:	Outdoor sports, cycling, skiing, etc
Function:	Waterproof, windproof, eye protection, sand proof

REFLECTIVE UNDERSHIRT SERIES

Reflective vests can improve visibility and achieve the effect of warning others, and have good comfort. By adopting a variety of high-grade fabrics, it has soft, breathable, sunscreen, anti-static and other protective functions, fully meeting the wearing needs of different scenes.

SAFETY WORKWEAR

Safety workwear are mainly used to protect the human body from serious work-related injuries or illnesses caused by exposure to chemical radiation, chemical corrosion, electric radiation, electric equipment, mechanical equipment, etc., or in some hazardous workplaces.

SW001
REFLECTIVE
SHIRTS

SPECIFICATION

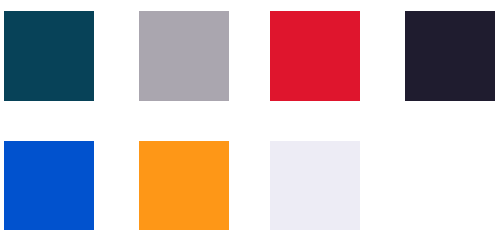

- High brightness night reflective strip
- 100% cotton fabric
- Four eye buttons, sturdy and sturdy
- Magic adhesive cuffs for quick adhesion and long-lasting durability

SW002
REFLECTIVE
SHIRTS

SPECIFICATION

- Classic Lapel Front and Back Reflective
- Large front chest flap pocket
- Double pen pockets on left arm
- Comfortable cuffs with flat shoulders
- Single deep side pocket on trousers
- Double knots in key areas

SW003

HI-VIS FR SUIT+PANTS

SPECIFICATION SUT

- EN 20471 Class 3
- Flame retardant thermoweld reflective tape comply with EN 20471
- Flame retardant thread
- Front closure with nylon zipper
- Two front pockets
- Two side pockets with 2 bellows in contrast on side
- Two back pockets
- Bottom with bellow in contrast on side

SPECIFICATION PANTS

- Stand collar with inside collar in contrast fabric
- Double front closure with nylon zipper
- Two chest pockets, right chest pocket has badge holder
- Two front pockets
- One sleeve pocket

SW004

INDUSTRY HIVIS COVERALL

SPECIFICATION

- YKK zipper/ Brass buttons in front closure
- Chest pockets with flaps
- Adjustable waistband and cuffs
- Actionback for free movement
- Side pockets with hidden side access
- Shaped knees with adjustable inside pockets
- Back pockets with flaps
- FR reflective tape on sleeves & legs & waist

SAFETY GLOVES

Protective gloves have characteristics such as wear resistance, cutting resistance, tear resistance, and puncture resistance. They are mainly used to protect hands from injury during work in workplaces with significant hand injuries, such as in factories, kitchens, chemical storage, and other places.

Product characteristics:

- Anti-Slip** The three-dimensional texture of the palm surface coating provides good grip and non-slip performance.
- Durable** Thermal gel technology, high purity coating and lining strong combination, better durability.
- Comfort** Ergonomic design, finger pre-curved shape, core lining, high elasticity, moisture wicking and breathable, good stretch, providing excellent comfort.

Glove heart material	Polyester
Coating material	PU
Coating area	palm dip
Number of stitches	13 /15/18/21 Gauge

Recommended Applications :

Construction and building materials / metal cutting / mining machinery / thin plate handling / security patrol

Product characteristics:

- Anti-Slip** The three-dimensional texture of the palm surface coating provides good grip and non-slip performance.
- Durable** Thermal gel technology, high purity coating and lining strong combination, better durability.
- Comfort** Ergonomic design, finger pre-curved shape, core lining, high elasticity, moisture wicking and breathable, good stretch, providing excellent comfort.

Glove heart material	Polyester
Coating material	PU
Coating area	palm dip
Number of stitches	13 /15/18/21 Gauge

Recommended Applications :

Construction and building materials / metal cutting / mining machinery / thin plate handling / security patrol

Product characteristics:

- Anti-Slip** The three-dimensional texture of the palm surface coating provides good grip and non-slip performance.
- Durable** Thermal gel technology, high purity coating and lining strong combination, better durability.
- Comfort** Ergonomic design, finger pre-curved shape, core lining, high elasticity, moisture wicking and breathable, good stretch, providing excellent comfort.

Glove heart material	Polyester
Coating material	Latex
Coating process	Wave
Coating area	Three-quarter dip
Number of stitches	13 /15/18/21 Gauge

Recommended Applications :

Construction and building materials / metal cutting / mining machinery / thin plate handling / security patrol

CUT RESISTANT SERIES | ACOS11

Product characteristics:

- Anti-Cut** Palm anti-vibration bead design, sponge porous energy-absorbing structure, reasonable layout, not only does not affect the flexibility of the palm joints, but also can effectively cushion the impact of tool vibration on the hands.
- Dexterity** Pure yarn gloves can be used alone to meet the sensitive touch of the hand; its unique fit and flexibility can also be used as a protective lining for other gloves, soft and light. Flexible combination
- Comfort** High moisture absorption rate, not easy to generate static electricity, good wearing comfort

Glove shell material	HPPE+Glass Fiber
Coating material	PU
Knitting process	13/15/18/21 Gauge

Recommended Applications:

Construction and building materials / metal cutting / mining machinery / thin plate handling / security patrol

CUT RESISTANT SERIES | ACOS012

Product characteristics:

- Safe** Anti-cut, high quality stainless steel wire, Stab-proof, Qnti-skid and Wear-resistant.
- Convenient** Flexible bending and easy to carry
- Comfort** The steel wire is wrapped in fibre, friendly to your skin.

Glove shell material	316 Stainless SteelPE Secant Materia
Function	Cut-proof, Stab-proof, Qnti-skid and Wear-resistant

Recommended Applications:

Construction and building materials / metal cutting / mining machinery / thin plate handling / security patrol

WELDING SERIES | WS001

Product characteristics:

- Wear resistant** Abrasion-resistant palm keeps hands dry and comfortable with a padded palm.
- Breathable** Uncoated for better breathability and less sweaty hands.
- Comfort** High moisture absorption rate, not easy to generate static electricity, good wearing comfort

Palm of the hand	AB Cow split leather
Back of the hand	Polyester fabric
Cuffs	Rubberized Cuff

Recommended Applications:

Metal cutting / building materials / mining machinery / electronic industry /equipment manufacturing

WELDING SERIES | WS002

Product characteristics:

- Wear resistant** Abrasion-resistant palm keeps hands dry and comfortable with a padded palm.
- Breathable** Uncoated for better breathability and less sweaty hands.
- Comfort** High moisture absorption rate, not easy to generate static electricity, good wearing comfort

Palm of the hand	AB Cow split leather
Back of the hand	Polyester fabric
Cuffs	Rubberized Cuff

Recommended Applications:

Metal cutting / building materials / mining machinery / electronic industry /equipment manufacturing

WELDING SERIES | WS003

Product characteristics:

- Wear resistant** Abrasion-resistant palm keeps hands dry and comfortable with a padded palm.
- Breathable** Uncoated for better breathability and less sweaty hands.
- Comfort** High moisture absorption rate, not easy to generate static electricity, good wearing comfort

Palm of the hand	AB Cow split leather
Back of the hand	Polyester fabric
Cuffs	Rubberized Cuff

Recommended Applications:

Metal cutting / building materials / mining machinery / electronic industry /equipment manufacturing

MECHANICAL SERIES | MS013

Product characteristics:

- Durable** Synthetic leather palm keeps hands dry and comfortable with padded palm pads
- Breathable** No large area coating, better air permeability, reduce hand sweating.
- Comfort** Ergonomic design, smooth natural hand shape, more flexible operation, effective relief of fatigue

Palm material	Microfibre
Back of the hand	Spandex
Cuffs	Elastane

Recommended Applications:

Aerospace / glass production / precision assembly / metal cutting / sheet metal handling

MECHANICAL SERIES | MS014

Product characteristics:

- Durable** Synthetic leather palm keeps hands dry and comfortable with padded palm pads
- Breathable** No large area coating, better air permeability, reduce hand sweating.
- Comfort** Ergonomic design, smooth natural hand shape, more flexible operation, effective relief of fatigue

Palm material	Cowhide
Back of the hand	Spandex
Cuffs	Elastane

Recommended Applications:

Aerospace / glass production / precision assembly / metal cutting / sheet metal handling

MECHANICAL SERIES | MS015

Product characteristics:

- Durable** Synthetic leather palm keeps hands dry and comfortable with padded palm pads
- Breathable** No large area coating, better air permeability, reduce hand sweating.
- Comfort** Ergonomic design, smooth natural hand shape, more flexible operation, effective relief of fatigue

Palm material	Sheepskin+ Kevlar
Back of the hand	Spandex
Cuffs	Elastane

Recommended Applications:

Aerospace / glass production / precision assembly / metal cutting / sheet metal handling

IMPACT SERIES | ACS010

Product characteristics:

Palm anti-vibration bead design, sponge porous energy-absorbing structure, reasonable layout, not only does not affect the flexibility of the palm joints, but also can effectively cushion the impact of tool vibration on the hands.

The palm surface is frosted with Vacuum anti-slip technology, which prevents slippage on dry and wet surfaces, making it easy to grip.

High moisture absorption rate, not easy to generate static electricity, good wearing comfort

Lining Material	Polyester
Coating material	Natural Latex+Nitrile rubber
Back of the hand	TPR anti-collision block
Knitting process	13/15/18/21 Gauge

Recommended Applications:

Construction and building materials / metal cutting / mining machinery / thin plate handling / security patrol

IMPACT SERIES | ACS011

Product characteristics:

Palm anti-vibration bead design, sponge porous energy-absorbing structure, reasonable layout, not only does not affect the flexibility of the palm joints, but also can effectively cushion the impact of tool vibration on the hands.

The palm surface is frosted with Vacuum anti-slip technology, which prevents slippage on dry and wet surfaces, making it easy to grip.

High moisture absorption rate, not easy to generate static electricity, good wearing comfort

Lining Material	Polyester
Coating material	Nitrile foam
Back of the hand	TPR anti-collision block
Knitting process	13/15/18/21 Gauge

Recommended Applications:

Construction and building materials / metal cutting / mining machinery / thin plate handling / security patrol

IMPACT SERIES | ACS015

Product characteristics:

- Collision Avoidance

Palm anti-vibration bead design, sponge porous energy-absorbing structure, reasonable layout, not only does not affect the flexibility of the palm joints, but also can effectively cushion the impact of tool vibration on the hands.
- Anti-slip

The palm surface is frosted with Vacuum anti-slip technology, which prevents slippage on dry and wet surfaces, making it easy to grip.
- Comfort

High moisture absorption rate, not easy to generate static electricity, good wearing comfort

Lining Material	HPPE+glass fiber
Coating material	Natural Latex+Nitrile rubber
Back of the hand	TPR anti-collision block
Knitting process	13/15/18/21 Gauge

Recommended Applications:

Construction and building materials / metal cutting / mining machinery / thin plate handling / security patrol

IMPACT SERIES | ACS016

Product characteristics:

- Collision Avoidance

Palm anti-vibration bead design, sponge porous energy-absorbing structure, reasonable layout, not only does not affect the flexibility of the palm joints, but also can effectively cushion the impact of tool vibration on the hands.
- Anti-slip

The palm surface is frosted with Vacuum anti-slip technology, which prevents slippage on dry and wet surfaces, making it easy to grip.
- Breathable

no large area coating, better breathability, reduce hand sweat.

Lining Material	HPPE+glass fiber
Coating material	Natural Latex+Nitrile rubber
Back of the hand	TPR anti-collision block
Knitting process	13/15/18/21 Gauge

Recommended Applications:

Construction and building materials / metal cutting / mining machinery / thin plate handling / security patrol

IMPACT SERIES | ACS017

Product characteristics:

- Collision Avoidance

Palm anti-vibration bead design, sponge porous energy-absorbing structure, reasonable layout, not only does not affect the flexibility of the palm joints, but also can effectively cushion the impact of tool vibration on the hands.
- Anti-slip

The palm surface is frosted with Vacuum anti-slip technology, which prevents slippage on dry and wet surfaces, making it easy to grip.
- Comfort

High moisture absorption rate, not easy to generate static electricity, good wearing comfort

Lining Material	HPPE+glass fiber
Coating material	wrinkle
Back of the hand	TPR bumper block
Knitting process	13/15/18/21 Gauge

Recommended Applications:

Construction and building materials / metal cutting / mining machinery / thin plate handling / security patrol

SAFETY WORK SHOES

Safety shoes can prevent object injuries or stab injuries, high and low temperature injuries, chemical injuries, electric shock injuries, and static electricity injuries.

SWS001

Upper Material: Microfiber leather

Sole Material: Ordinary rubber sole

Functionality: Anti-smash + anti-puncture

Craftsmanship: Glued + sewn

SWS002

Upper Material: Microfiber leather

Sole Material: Ordinary rubber sole

Functionality: Anti-smash + anti-puncture

Craftsmanship: Glued + sewn

SWS003

Upper Material: Microfiber leather

Sole Material: Ordinary rubber sole

Functionality: Anti-smash + anti-puncture

Craftsmanship: Glued + sewn

SWS004

Upper Material: Microfiber leather

Sole Material: Ordinary rubber sole

Functionality: Anti-smash + anti-puncture

Craftsmanship: Glued + sewn

SWS005

Upper Material: 1.4-1.6mm cow split leather

Sole Material: PU

Functionality: Anti-smash + anti-puncture

Craftsmanship: Injection molding

SWS006

Upper Material: 1.4-1.6mm cow split leather

Sole Material: PU

Functionality: Anti-smash + anti-puncture

Craftsmanship: Injection molding

SWS007

Upper Material: 1.4-1.6mm cow split leather

Sole Material: PU

Functionality: Anti-smash + anti-puncture

Craftsmanship: Injection molding

SWS008

Upper Material: 1.4-1.6mm cow split leather

Sole Material: PU+Rubber Bottom

Functionality: Anti-smash + anti-puncture

Craftsmanship: Injection molding

SWS009

Upper Material: Pigskin

Sole Material: Wear-resistant Oxford Sole

Functionality: Anti-smash + Anti-puncture

Craftsmanship: Gluing

SWS010

Upper Material: Open-faced Cowhide

Sole Material: Wear-resistant Oxford Sole

Functionality: Anti-smash + Anti-puncture

Craftsmanship: Gluing

SWS011

Upper Material: High-quality tumbled leather

Sole Material: Wear-resistant oxford sole

Functionality: Anti-smash + anti-puncture

Craftsmanship: Gluing

SWS012

Upper Material: High-quality tumbled leather

Sole Material: Wear-resistant oxford sole

Functionality: Anti-smash + anti-puncture

Craftsmanship: Gluing

SWS013

Upper Material: High-quality tumbled leather

Sole Material: PU

Functionality: Anti-smash + anti-puncture+Anti-slip

Craftsmanship: injection molding

SWS014

Upper Material: Frosted microfiber leather

Sole Material: PU

Functionality: Anti-smash + anti-puncture+Anti-slip

Craftsmanship: injection molding

SWS015

Upper Material: High-quality tumbled leather

Sole Material: PU

Functionality: Anti-smash + anti-puncture+Anti-slip

Craftsmanship: injection molding

SWS016

Upper Material: Premium Crazy Horse Leather

Sole Material: PU

Functionality: Anti-smash + anti-puncture

Craftsmanship: injection molding

SWS017

Uppers: Embossed Leather

Inside: Sandwich mesh

Outsole: PU/PU

Function: Anti-inpact Anti-puncture Anti-static electrical insulation

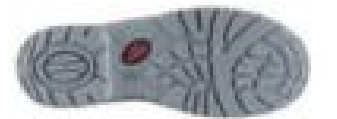

SWS019

Uppers: Embossed Leather

Inside: Sandwich mesh

Outsole: PU/PU

Function: Anti-inpact Anti-puncture Anti-static electrical insulation

SWS018

Uppers: Embossed Leather

Inside: Sandwich mesh

Outsole: PU/PU

Function: Anti-inpact Anti-puncture Anti-static electrical insulation

SWS020

Uppers: Suede Leather

Inside: Sandwich mesh

Outsole: Rubber

Function: Anti-inpact Anti-puncture Anti-static electrical insulation

SWS021

Uppers: Microfiber Leather

Inside: Sandwich mesh

Outsole: Rubber

Function: Anti-impact Anti-puncture Anti-static electrical insulation

SWS023

Uppers: Microfiber Leather

Inside: Artificial wool

Outsole: Rubber

Function: Anti-impact Anti-puncture Anti-static electrical insulation

SWS022

Uppers: Microfiber Leather

Inside: Sandwich mesh

Outsole: Rubber

Function: Anti-impact Anti-puncture Anti-static electrical insulation

SWS024

Uppers: Microfiber Leather

Inside: Artificial wool

Outsole: Rubber

Function: Anti-impact Anti-puncture Anti-static electrical insulation

SWS025

Uppers: Microfiber Leather
Inside: Sandwich mesh
Outsole: Rubber
Function: Anti-inpact Anti-puncture Anti-staticelectrical insulation

SWS026

Uppers: Microfiber Leather
Inside: Sandwich mesh
Outsole: Rubber
Function: Anti-inpact Anti-puncture Anti-staticelectrical insulation
