1.56	NK55	Grey/Brown	70/75mm
Abbe	Specific Gravity	Transmission	Coating
38	1.20	0.97	HC,HMC/AR Coating

### What's the importance of a good semi-finished lens to RX production?..

- High qualified rate in power accuracy and stability
- High qualified rate in cosmetics quality
- High optical features
- Good tinting effects and hard-coating/AR coating results
- Realize the maximum production capacity
- Punctual delivery

Not just superficial quality, semi-finished lenses are more focus on the internal quality, such as precise and stable parameters, especial for the popular freeform

### SEMI-FINISHED LENS

### AR Coating.

- 1.Fast speed of changing, from white to dark and vice versa.
- 2.Perfectly clear indoors and at night, adapting spontaneously to varying light conditions.
- 3.Very deep color after change, the deepest color can be up to 75~85%.
- 4.Excellent color consistency before and after change.

--HC(hard coating): To protect the uncoated lenses from scratch resistance

--HMC(hard multi coated/AR coating): To protect the lens effectively from reflection, enhance functional and clarity of your vision

--SHMC(super hydrophobic coating): To make the lens waterproof, antistatic, anti slip and oil resistance.
