

# JG ANTI GLARE

## ANTI GLARE SERIES LED LIGHT BARS

The JG ANTI GLARE Lightbars offer driving beams with very powerful lightoutput up to 8965 lumen, ideal for off-road situations where you need this the most. They have a recognizable and attractive full blackout appearance, slim and edgeless design.

Typical applications would be installations as Hood, Bumper, Ground Bumper and Roof top.

The product scored the highest dust / waterproof rating among the military breather and the edgeless design prevents dust deposits from settling along edges.

The extra cable allows easy mounting on your vehicle. The ANTI GLARE Lightbars have an integrated thermal sensor that adapts to the ambient temperature. This new feature not only prevents overheating or LED failure, but also increases light output when the ambient temperature is low. In this way the user is given the optimum light under all conditions.

### SPECIFICATIONS

- ★ Edgeless design
- ★ Hood face big spot reflector
- ★ Osram chips
- ★ Military breather
- ★ Intense light output

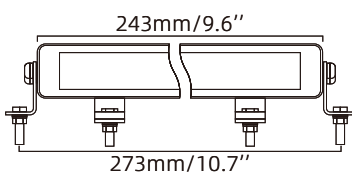

Size	LEDs	Voltage	Real Power	Real Lumen	CCT	Illumination Distance	Beam Pattern	DRL	Waterproof
