

KEPERSURF®-1755 Surface control additive

KEPERSURF® -1755

**Organic silicon levelling agent that moderately
reduces surface tension****Product type**

Polyether-modified polysiloxane levelling agent

Product usage

General organosilicon levelling agent in water-based&solvent-based systems , it has excellent levelling speed and levelling property.

Physical data

1. Effective ingredient: polyether-modified polysiloxane
2. Appearance: colorless-light yellow transparent liquid
3. Content: 50±2%
4. Specific gravity: about 0.97(25°C)
5. Solvent: ethylene glycol butyl ether

Product features

1. Effectively reduce the surface tension of the system, excellent levelling speed and levelling property.
2. excellent substrate wetting ability, can effectively eliminate shrinkage holes in the paint film.
3. With excellent compatibility, can be used in water-based&solvent-based systems.
4. It has certain defoaming performance and excellent recoating performance.

Suggested dosage

According to the supply type,
For the total amount of formula: 0.1-1%
The best dosage needs to be obtained through testing

Add methods and precautions

1. it can be diluted with water or common solvents
2. it can be added at any stage of coating manufacturing, but ensure that it is evenly dispersed in the system

Scope of application

Suitable for water-based and solvent-based coatings, inks

Safety instructions

Refer to the MSDS

Packing specifications

- 1、 25KG, 180 KG plastic bucket, iron bucket
- 2、 Sample: 60ml glass bottle

KEPERSURF®-1755 Surface control additive

Transportation and storage

- 1、Containers should be sealed during transport and storage, and no freezing and ambient temperature lower than 40°C .
- 2、The shelf life is 2 years, starting from the date of production..
