

KEPERSURF®-193 Surface control additive

KEPERSURF® -193

Silicon surface additive of strongly decreasing surface tension

Product type

Polyether-modified polysiloxane levelling agent

Product usage

In the water system, solvent and UV system, the surface tension is reduced intensively, and the floating and leveling, orientation speed and smooth feel are greatly improved

Physical data

1. Effective ingredient: polyether-modified polysiloxane
2. Appearance: Colorless-pale yellow-pale red clear liquid
3. Content: 100%
4. Specific gravity: about 1.02(25°C)

Product features

1. Strongly reduces the surface tension of the system, can be used in water-based, solvent-based and UV systems.
2. Small side effects and high safety under large dosage.
3. With excellent slippery feeling and compatibility. Excellent wettability, anti-shrinkage porosity, anti-floating color ability. Unstable bubbles.
4. Good transparency in high gloss system, excellent matte powder orientation in matte paint. Good recoating performance.

Suggested dosage

According to the supply type,
For the total amount of formula: 0.1-0.5%
The best dosage needs to be obtained through the test

Add methods and precautions

1. Can be diluted and added with common solvent or water
2. Added slowly under medium or low shear force to ensure that it is evenly dispersed in the system

Scope of application

Suitable for water-based, solvent-based, UV coatings and inks.

Safety instructions

Refer to the MSDS

Packing specifications

1. 25KG, 200 KG iron bucket
2. Sample: 60ml glass bottle

KEPERSURF®-193 Surface control additive

Transportation and storage

- 1、Containers should be sealed during transport and storage, and no freezing and ambient temperature lower than 40°C .
- 2、 The shelf life is 2 years, starting from the date of production.
