

KEPERSURF®-194 Surface control additive

KEPERSURF® -194

Silicon surface additive that strongly reduces surface tension

Product type

Polyether-modified polysiloxane levelling agent

Product usage

In the water system, solvent and UV system, the surface tension is reduced intensively, and the floating and leveling, orientation speed and smooth feel are greatly improved

Physical data

1. Effective ingredient: polyether-modified polysiloxane
2. Appearance: colorless-pale yellow pale red clear liquid
3. Content: 100%
4. Specific gravity: about 1.01(25°C)

Product features

1. Strongly reduces the surface tension of the system, can be used in water-based, solvent-based and UV systems.
2. Fast leveling, with outstanding slippery feeling, excellent anti-adhesion effect.
3. Excellent wettability, excellent anti-shrinkage porosity, scratch resistance and anti-floating color ability, excellent matte powder orientation in matte paint.

Suggested dosage

According to the supply type,
For the total amount of formula: 0.1-1%
The best dosage needs to be obtained through testing

Add methods and precautions

1. Can be diluted and added with common solvent
2. Can be added at any stage of coating manufacturing, but ensure that the base is evenly dispersed in the coating system

Scope of application

Suitable for water-based, solvent-based, UV coatings and inks

Safety instructions

Refer to the MSDS

Packing specifications

- 1、25KG, 200 KG iron bucket
- 2、Sample: 60ml glass bottle

KEPERSURF®-194 Surface control additive

Transportation and storage

- 1、Containers should be sealed during transport and storage, and no freezing and ambient temperature lower than 40°C .
- 2、The shelf life is 2 years, starting from the date of production..
