

PRODUCT DATA SHEET

Trade Name: ActiBiso™ GA 99

INCI Name: Glycolic Acid

CAS: 79-14-1

Description

ActiBiso™ GA 99 (Glycolic Acid) is a kind of fruit acid, can be synthesized anti-aging, whitening cosmetics raw materials. It is the fruit acid with the smallest relative molecular weight, and it penetrates into the skin to the highest degree. It can effectively penetrate the pores, accelerate cell shedding, promote skin renewal and improve the excessive keratosis of the skin, and release the keratin plugs blocking the pores to keep the pores unclogged. The ingredient can increase the content of hyaluronic acid in the skin, improve the water retention ability of the skin, and increase the formation of collagen elastic fibers in the dermis, play a role in moisturizing and nourishing the skin, significantly improve the skin texture, and solve the problems of wrinkles, dark spots, acne and soon.

Quality Parameters

Appearance	White crystalline powder
Assay %	99.0 min
Loss on drying %	0.5 max
Chloride (ppm)	10.0 max
Sulphate (ppm)	100 max
Iron (ppm)	10.0 max
Heavy metal (ppm)	10.0 max

Storing

Store in a dry and cool place, sealed and valid for 2 years.

Package

25kg/ drum.
