

PRODUCT DATA SHEET

Trade Name: ActiBiso™ PAD

INCI Name: Potassium Azeloyl Diglycinate ; Water ; Phenoxyethanol ; Pentylene Glycol ; Ethylhexylglycerin

CAS: 477773-67-4;7732-18-5;122-99-6;5343-92-0;70445-33-9

Description

ActiBiso-PAD is a kind of water-soluble diamine azelaite, which improves the technical characteristics of the formula. Potassium Azeloyl Diglycinate is a safe, efficient and multifunctional cosmetic ingredient. As a diamine potassium salt, Potassium Azeloyl Diglycinate is a new component, which solves many problems in the formulation. Potassium Azeloyl Diglycinate is water-soluble with less dosage and strong anti-inflammatory effect.

Quality Parameters

Appearance	Colorless to light yellow transparent liquid
Solubility	Soluble in water
Assay %	28 - 34
pH	6.5 - 8.0
Relative density	1.110 - 1.170
Heavy metals %	0.001 max

Storing

Store in a dry and cool place, sealed and valid for 2 years.

Package

1kg / aluminum bottle
