Open Cell Ceiling (Grid Ceiling)

Advantages

The T-Shaped Grille is a special type of ceiling grille, characterized by its shape resembling the Latin letter "T." T-shaped grilles typically consist of main beams and cross beams, forming a T-shaped structure. This type of grille system is often used in environments where more design details and visual variations are desired, such as conference rooms and restaurants. T-shaped grilles can provide good acoustic performance, including sound absorption and insulation, as their spacing and geometric structure help disperse and reduce the propagation of sound waves.

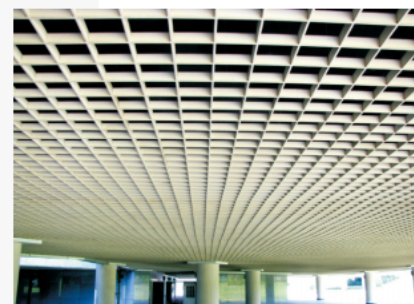

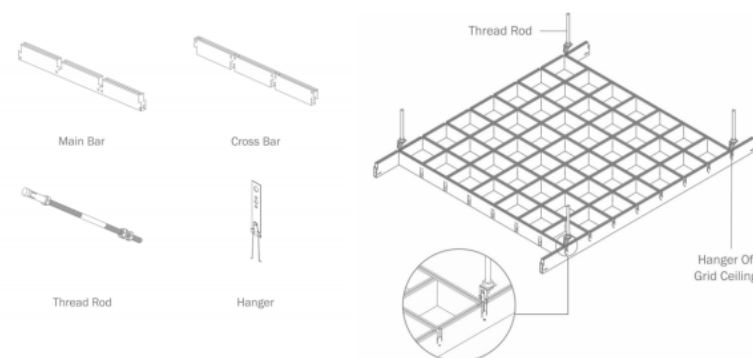

Application

Aluminum grid Ceiling applies to: large commercial office, Municipal Office Projects, Convention and Exhibition Center, large venues, museums, senior clubs; complex building, hotel lobby, office, Shopping malls, supermarkets, shopping malls, railway stations, subways, airports and other public places.

Installation Node Diagram

General Parameters

50×50mm	120×120mm
75×75mm	150×150mm
100×100mm	200×200mm

Length:1990mm;Width:10-30(mm)High:15-100(mm)Thickness:0.3-0.6(mm)

The surface has Fluorocarbon paint, polyester paint, thermal transfer wood grain, roller-coated wool grain, roller-coated solid color, powder-sprayed baking varnish, and other colors. Sample customization can be provided.
