

COMMUNICATION STATION SOLUTION
PROFESSIONAL MANUFACTURER SINCE 2006

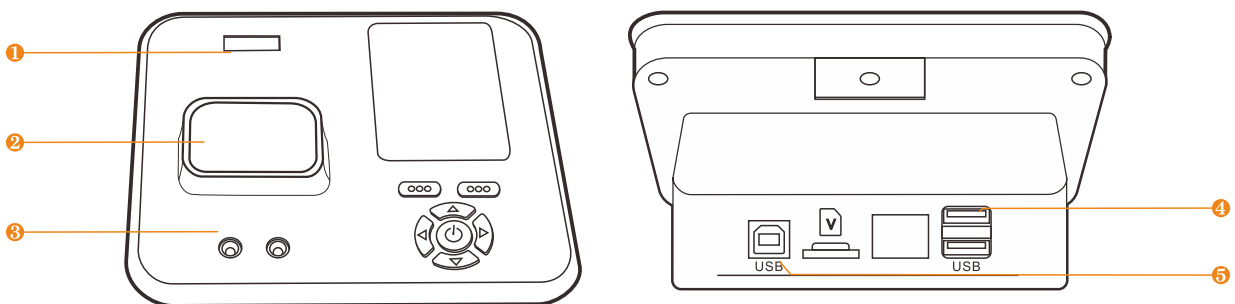

Key Features

- Wire transferred reader's data to software via cable
- Quick charge for patrol readers
- Auto-sync time with software once communication

ZOOY Z-9200 is an communication station that transfers offline patrol wand's data to the software directly through cable. It mainly to solve the inconvenience of repeated plugging between multiple devices and software via communication cable, meanwhile the device can be charged while downloading data. Z-9200 is shareable with all of ZOOY offline patrol wands, not only greatly improves the patrol efficiency and also reduce the cost of employee and facility.

Layout

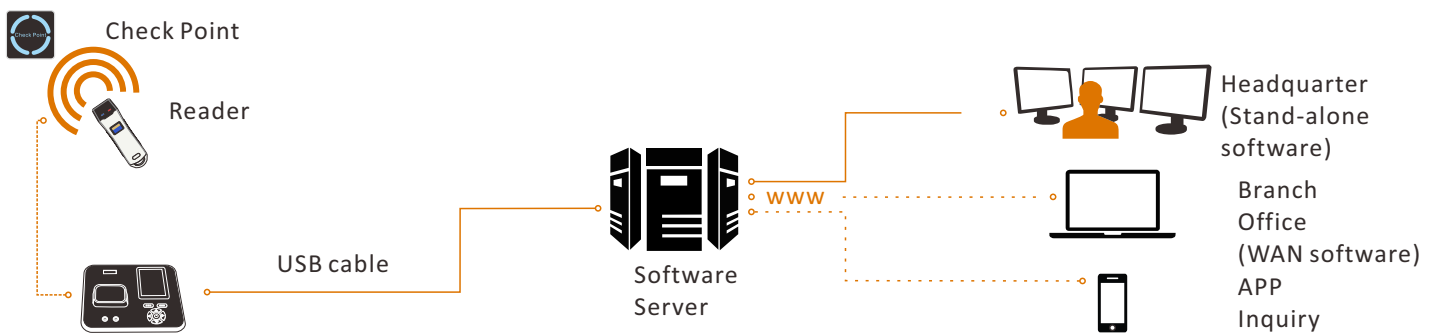

- 1 Label
- 2 Charging/communication socket
- 3 Indicator lamps
- 4 USB port
- 5 Power port

Specification

Network	Wi-Fi	802.11a/b/g/n
	Ethernet	Ethernet
Communication/Charging	Socket supported	Z-6200C, Z-6200D, Z-6200E, Z-6200X
	USB supported	Z-3000, Z-6200, Z-6200F+, Z-6600, Z-6600T
System	Battery	No, power supplied by USB cable
	Prompt	LED
	USB port	2 ports, communication/charging together
Work environment	Temperature	-20°C to 70°C
	Humidity	0-95%
Size	Dimension	145*95*85mm
	Weight	253g
