NBR Foam Series NBR软板系列

我们开发了新的 NBR 软板来代替以前的 EVA 软板，其优点如下。

We have developed the new NBR foam to displace of previous EVA foam, advantages as below.

* 翘曲：NBR 软板很好地解决了翘曲问题。

* Warping: The NBR foam solves the problem of warping well, which is different from the previous EVA foam.

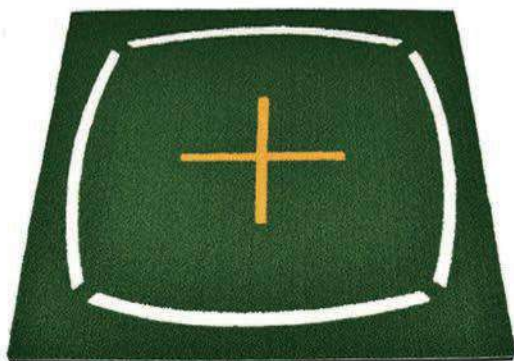

* 减震 & 回弹性：NBR 软板具有柔软性和较高的回弹性能，既可以有效吸收击球时的震动冲击，给运动选手的手臂更低的震动力，满足了高端运动性能的要求；并且回弹性好，防止垫层在长久踩踏之后失去弹性。

* Shock absorption & Elasticity: With softness and higher resilience performance, it can effectively absorb the shock when hitting the ball, giving the athletes lower arm vibration force. It also has good elasticity and prevents the cushion from long pedaling.

Teaching Mats Series 教学垫系列

我们可以自定义各种教学垫的结构。

We can customize the structure for all kinds of teaching mats.
