Company and product overview

About Meikemei

Zhongshan Meikemei Hardware & Electrical Appliance Co., Ltd. has 15 years of professional experience since its establishment in 2009, focusing on the customized production of heating tubes, 304 heating plates, die castings, steam cookers, stainless steel pots and other products.

Our strength

At present, the company's annual production capacity exceeds 50 million pieces, and has been well received and selected by home appliance companies such as SUPOR, Joyoung, Midea, France's SEB, and Japan's PIGEON.

Professional customization, excellent quality

With a technical and quality development team with more than 20 years of experience and 30 years of experience in the electric heating pipe industry, we adhere to the purpose of "excellent quality, scientific management, and perfect service" and are a professional manufacturer of customized electric heating system accessories.

Established Meikemei

In December 2009, Meikemei started with a team of more than 10 people, focusing on "electric heating tubes" and an annual output of 1 million units, and embarked on the road of development with electric heating tubes as its core product.

Well-known brand recognition

In 2014, it was recognized by well-known brands such as Midea, Supor and Joyoung, with an annual output of 10 million units, achieving rapid growth.

Develop categories

A branch was established in 2020 to expand into iron pipes, stainless steel, die-castings and steam components, with an annual output of over 30 million pieces, improving overall competitiveness.

high quality development

In 2025, the new headquarters building will be completed, with more than 180 employees and an annual output of more than 50 million units, entering a new stage of high-quality development.

主营业务 Main Business

Aluminum heating tube

We provide aluminum heating tubes, suitable for stainless steel welding and die-cast aluminum riveting, to make various water heating electrical products, such as: electric kettles, coffee machines, electric steamers, etc.

Aluminum die-cast
heating element

We specialize in the production of high-precision die-casting parts, which are widely used in coffee machines, instant steam generators, etc.

Stainless steel
heating plate

The heating plate is the core component of the heating equipment and is suitable for commercial kitchen appliances, commercial kitchen equipment, various household appliances and industrial equipment for heating water and generating steam.

Stainless steel
heating tube

Stainless steel heating tubes are widely used in commercial rice steamers, water heaters, noodle soup cookers, smart toilets, steamers and other scenarios, providing efficient and durable heating solutions.

加热管系列产品概述

Overview of Heating Tube Series Products

Multi-material heating tube solutions

Our heating tube products include three materials: stainless steel, aluminum tube and iron-plated copper, which are widely used in industrial, household and commercial fields. We provide customers with reliable and durable solutions to meet diverse needs.

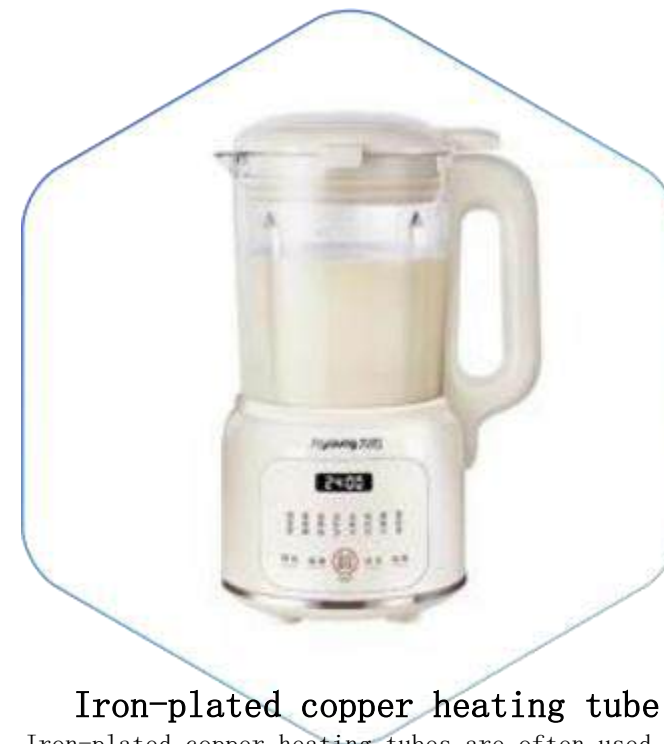

Stainless steel heating tubes

Stainless steel heating tubes are widely used in smart toilets due to their excellent corrosion resistance and high temperature performance. They can quickly heat the water flow to ensure a comfortable cleaning experience while maintaining long-term durability in high humidity environments

Aluminum heating tube

Aluminum tube heating elements are mainly used in electric kettles due to their lightweight design and efficient thermal conductivity. They can heat water quickly, are energy-efficient and are ideal for home appliances.

Iron-plated copper heating tube

Iron-plated copper heating tubes are often used in wall-breaking machines due to their excellent conductivity and economy. They can operate stably under high-intensity working conditions, ensuring that the equipment can efficiently crush food while maintaining durability.

铝&铁 加热管产品系列概述

Overview of Aluminum&Iron Heating Tube Product Series

A

The electric kettle uses high-quality aluminum heating tubes, which have the characteristics of efficient heat conduction and rapid heating. The heating tubes have outer diameters of 70-150mm, 12V~240V, and various specifications of 60w~3000w.

B

The travel electric cup heating tube adopts high-efficiency heating technology, is compact and lightweight, has an outer diameter of 30-70mm, 7.4v~220v, 60~400w and various specifications suitable for travel use.

C

The electric heating tube of the wall-breaking machine adopts high-efficiency heating technology, which can quickly and evenly heat the ingredients to ensure the full release of nutrients. Heating tube outer diameter: 30-150mm, 100v-240v, 300w-1500w

D

The electric heating tube of the health pot adopts high-efficiency heating technology, which can accurately control the temperature to ensure that the nutrients of the ingredients are fully released. 30-150mm, 100v-240v, 500w-2000w

不锈钢加热管产品系列概述

Overview of Stainless Steel Heating Tube Product Series

- **Smart toilet**
Stainless steel heating tubes are used in smart toilets to quickly heat the water flow, provide a comfortable cleaning experience, and are corrosion-resistant and suitable for high humidity environments. Specifications: 100v-240v, 1000w-1600w

- **Medical equipment**
Stainless steel heating tubes are used in medical equipment, such as dental chair sterilizers, and thermostatic equipment, ensuring efficient heating and corrosion resistance, meeting strict hygiene standards. Specifications: 12v-48v, 60w-500w

- **Oven heating tube**
In the oven, the stainless steel heating tube provides uniform high temperature heating, ensuring perfect food baking effect, while having long life and durability. Specifications: 100v-380v, 300w-30kw

铝压铸发热体系列产品概述

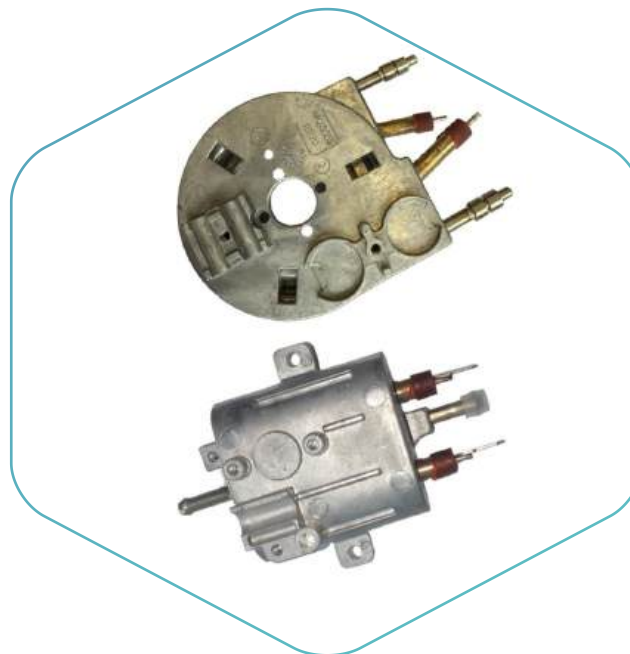

Overview of Aluminum Die Casting Heating Element Series Products

The perfect combination of durability and performance

Our die castings are precise and strong, and are widely used in home appliances such as coffee machines and floor scrubbers. They provide stable and durable core components, meet strict quality requirements, and provide customers with reliable solutions.

Our die castings are widely used in coffee machines, mainly used to manufacture core components that can output hot water and steam at the same time. Ensure that the coffee machine operates efficiently and provides users with a perfect coffee experience. Specifications: 100v-240v, 600w-3000w

In floor scrubbers, our die castings are used to manufacture high-temperature disinfection modules, which can effectively heat the mop head, kill bacteria, and ensure cleanliness and hygiene. These parts have excellent corrosion resistance and durability, suitable for high-frequency use. Specifications: 100v-240v, 600w-1500w

发热盘产品系列概述

Overview of Heating Plate Product Series

● Milk frother heating plate

The milk frother heating plate is the core heating component of the milk frother. It is made of high-quality stainless steel and has the characteristics of fast heating, uniform heat conduction and corrosion resistance. Specifications: 100v-240v, 300w-1000w

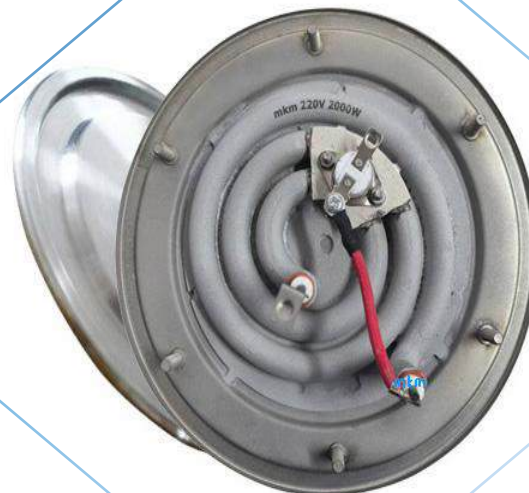

● Hot water bucket heating plate

The heating plate of the water barrel is the core heating component of the water barrel. It uses high-efficiency heat-conducting materials and can quickly heat water to boiling. Specifications: diameter 160-300mm, 100v-380v, 1000w-4000w

● Noodle cooker heating plate

The heating plate of the commercial noodle cooker adopts high-efficiency heating technology to ensure fast and uniform heating effect and meet the needs of high-intensity use. Specifications: 100v-380v, 1000w-12000w

● Egg boiler heating plate

The egg boiler heating plate uses efficient heating technology to quickly and evenly heat the water, ensuring that the eggs are cooked evenly. Specifications: 100v-240v, 250w-500w

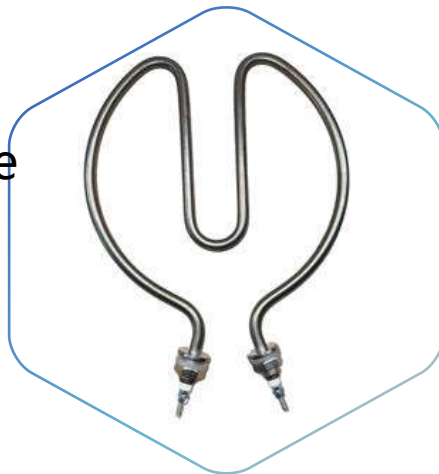

不锈钢加热管产品系列应用场景

Application scenarios of stainless steel heating tube product series

Stainless steel heating tube application scenarios

The steam cooker heating element uses efficient heating technology to quickly generate steam, ensuring uniform heating and stable performance. Its high temperature and corrosion resistant design is suitable for long-term use and is the core component of the steam cooker's efficient operation. Specifications: 100v-380v, 100w-6000w

我们的优势

Our advantage

Our advantages

Our Advantages

We provide diversified, customized, high-quality heating elements that are widely used in a variety of fields, and are equipped with professional technical support and fast delivery services to meet the diverse needs of customers.

Diversified products, customized services

We provide heating tubes made of various materials such as stainless steel, aluminum tubes, and iron-plated copper. We also provide professional customized services and design and manufacture heating tubes of various specifications and performances according to customer needs.

Technical support

Provide professional technical consultation and after-sales service to solve problems encountered by customers.

High quality guaranteed

Advanced production technology and strict quality control are used to ensure product durability and reliability.

Fast delivery

With mature production lines and efficient logistics, we ensure that orders are delivered on time.

Diversified products, customized services--- stainless steel heating tubes

Our stainless steel heating tubes provide diversified products and customized services, and are widely used in smart toilets, water heaters, ovens, rice steaming cabinets and commercial kitchenware to meet a variety of heating needs.

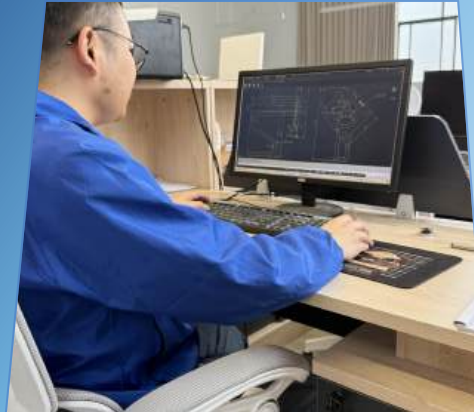

Technical support & solution customization

The engineering team with 30 years of experience can quickly solve various technical problems encountered by customers.

With advanced production equipment and technology, we can quickly produce electric heating tube samples to meet customer testing needs.

According to customer needs, we provide professional electric heating tube design solutions, including structural design, material selection, power calculation, etc.

Professional technical team: With many experienced engineers, covering multiple fields such as product design, process development, quality control, etc.

High quality guaranteed

High quality guaranteed

1. Every employee adheres to the attitude of striving for excellence and carefully checks every product

2. Introduce advanced automated production equipment to improve production efficiency and product consistency.

Fast delivery

1. Cooperate with multiple logistics companies to select the best transportation routes and methods to shorten transportation time.
2. Introduce advanced automated production equipment to improve production efficiency and shorten production cycle. Flexible production can quickly switch to produce products of different specifications

Talent development

Talent Development

Care about employee growth

We always care about the growth and development of our employees and provide a variety of training and learning opportunities to help employees improve their skills and achieve their career goals. By creating a supportive working environment, we encourage every employee to realize their potential and make progress together with the company.

Incentive mechanism

We have established a complete incentive mechanism, selecting outstanding employees and giving them rewards every month, and selecting annual outstanding employees and outstanding teams every year to commend their outstanding contributions. Through this mechanism, we motivate employees to make continuous progress and create a positive team atmosphere.

Training and empowerment support

We value the growth and development of our employees, conduct regular employee training every Thursday, and organize special skills improvement courses every month. Through systematic training and empowerment, we help employees improve their professional capabilities and achieve common progress for individuals and the company.

Complete training system

We have established a comprehensive training system covering multiple aspects such as on-the-job training, skills improvement, and management capability development. Through systematic course design and practical opportunities, we help employees improve their abilities in an all-round way, achieve their career development goals, and continuously provide high-quality talents for the company.

Perfect employee development mechanism

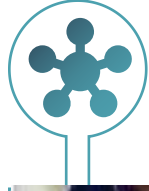

We have established a comprehensive employee development mechanism to support employees in achieving their personal growth and career goals through career planning, skills training and promotion channels. We believe that the success of our employees is the cornerstone of corporate success.

Corporate Culture

By advocating the spirit of thrift, we not only practice the concept of environmental protection, but also cultivate employees' awareness of thrift and sense of responsibility, demonstrating our commitment to sustainable development.

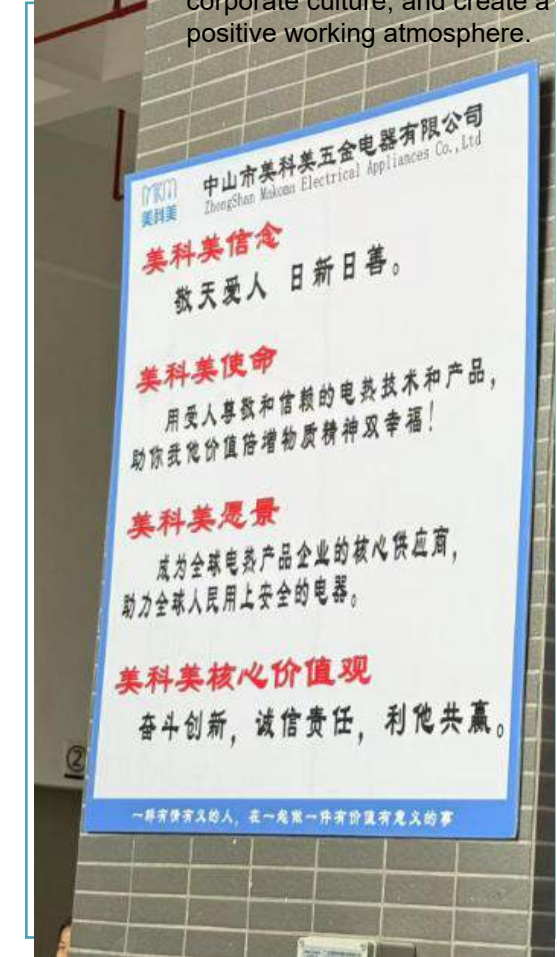

With the participation of all employees in the general cleaning, we not only created a comfortable working environment, but also cultivated teamwork and a sense of responsibility, demonstrating our pursuit of details and quality.

Our company has its own philosophy manual, which encourages employees to learn and think outside of work. We attach great importance to employee growth and corporate culture.

Corporate culture slogans can be seen everywhere. Through slogans, posters and other forms, we integrate core values into daily work, encourage employees to practice corporate culture, and create a positive working atmosphere.
