

XDL20-XCD Truck Tail Plate Power Control Box series

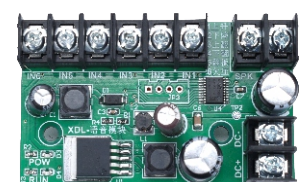

Optional Module Images

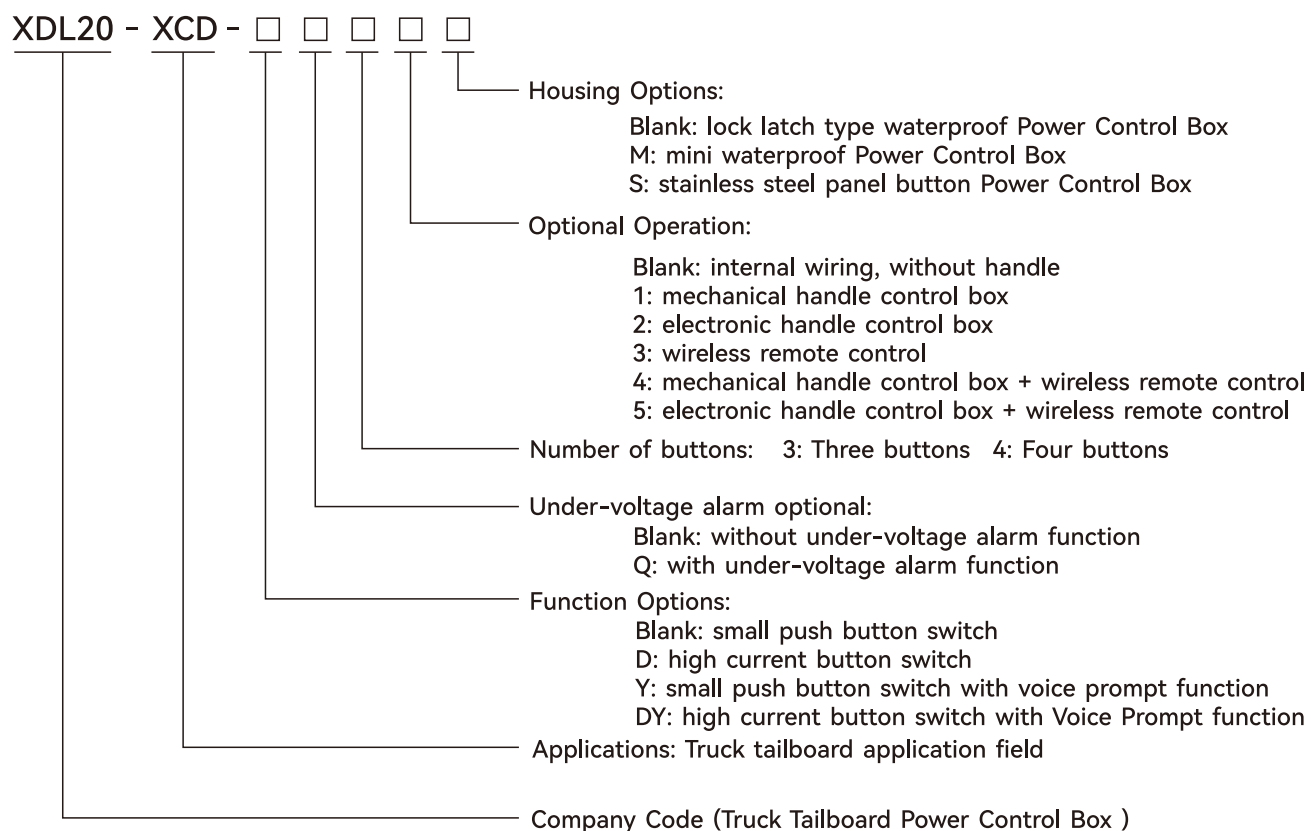

Wireless receiving module (optional)

Battery under-voltage module (optional)

Voice prompt module (optional)

Technical Parameters

Housing Material	ABS
Protection Level	IP65
Operating Power Supply	Ue:DC12V~24V Ie:5A
Power Consumption	< 2W
Cable Length/Diameter	Signal cable of power unit 3 meters, signal cable of limit switch 1.5 meters, signal cable of handle control box 0.6 meters (customizable)/0.75mm ²
Operating Temperature Range	-35°C~+55°C
Operating Humidity Range	< 90%RH
Air Pressure	86~106KPa
Product Weight	3 holes / 4 holes 2.5kg

Truck Tail Plate Power Control Box series (high current type)

XINDALI
— Since 1997 —

Three-button power control box (high current type)

XDL20-XCD-D3

Waterproof level
IP65

With Lock Latch

Good performance to resist of vibration, waterproof and dustproof.

Integrated design

Exquisite appearance and convenient operation

High Current

Rated current 200A,
maximum current 250A

Four-button power control box (high current type)

XDL20-XCD-D4

Waterproof level
IP65

With Lock Latch

Good performance to resist of vibration, waterproof and dustproof.

Integrated design

Exquisite appearance and convenient operation

High Current

Rated current 200A,
maximum current 250A

Truck Tail Plate Power Control Box series (high current with voice prompt type)

XINDALI
— Since 1997 —

Three-button power control box (high current with voice prompt type)

XDL20-XCD-DY3

Waterproof level
IP65

With Lock Latch

Good performance to resist of vibration, waterproof and dustproof.

Integrated design

Exquisite appearance and convenient operation

High Current

Rated current 200A, maximum current 250A

Voice Prompt

Equipped with voice speakers, customizable broadcast content

Four-button power control box (high current with voice prompt type)

XDL20-XCD-DY4

Waterproof level
IP65

With Lock Latch

Good performance to resist of vibration, waterproof and dustproof.

Integrated design

Exquisite appearance and convenient operation

High Current

Rated current 200A, maximum current 250A

Voice Prompt

Equipped with voice speakers, customizable broadcast content

Three-button power control box

XDL20-XCD-3

Waterproof level
IP65

With Lock Latch

Good performance to resist of vibration, waterproof and dustproof.

Integrated design

Exquisite appearance and convenient operation

Four-button power control box

XDL20-XCD-4

Waterproof level
IP65

With Lock Latch

Good performance to resist of vibration, waterproof and dustproof.

Integrated design

Exquisite appearance and convenient operation

Button protective cover

Anti mis-operation, waterproof and dustproof

Truck Tail Plate Power Control Box series (voice prompt type)

XINDALI
— Since 1997 —

Three-button power control box (voice prompt type)

XDL20-XCD-Y3

Waterproof level
IP65

With Lock Latch

Good performance to resist of vibration, waterproof and dustproof.

Integrated design

Exquisite appearance and convenient operation

Voice Prompt

Equipped with voice speakers, customizable broadcast content

Four-button power control box (voice prompt type)

XDL20-XCD-Y4

Waterproof level
IP65

With Lock Latch

Good performance to resist of vibration, waterproof and dustproof.

Integrated design

Exquisite appearance and convenient operation

Voice Prompt

Equipped with voice speakers, customizable broadcast content

Button protective cover

Anti mis-operation, waterproof and dustproof

Truck Tail Plate Power Control Box series (two-hands button type)

XINDALI
— Since 1997 —

Four-button power control box (two-hands button type)

XDL20-XCD-4

Waterproof level
IP65

With Lock Latch

Good performance to resist of vibration, waterproof and dustproof.

Integrated design

Exquisite appearance and convenient operation

Safe operation with both hands

Two-hands buttons operation to Flip up or down, safe and reliable

Four-button power control box (two-hands button voice prompt type)

XDL20-XCD-Y4

Waterproof level
IP65

With Lock Latch

Good performance to resist of vibration, waterproof and dustproof.

Integrated design

Exquisite appearance and convenient operation

Safe operation with both hands

Two-hands buttons operation to Flip up or down, safe and reliable

Voice Prompt

Equipped with voice speakers, customizable broadcast content

Four-button power control box (two-hands button high current type)

XDL20-XCD-D4

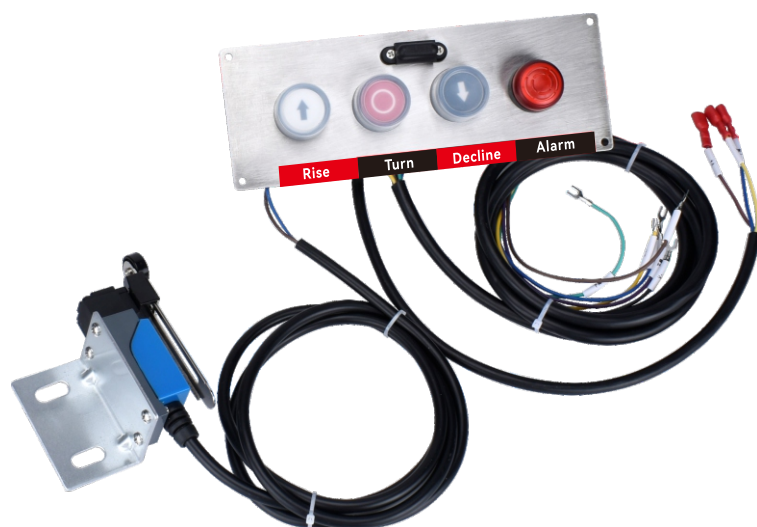

-  **Waterproof level IP65**
-  **With Lock Latch**
Good performance to resist of vibration, waterproof and dustproof.
-  **Integrated design**
Exquisite appearance and convenient operation
-  **Safe operation with both hands**
Two-hands buttons operation to Flip up or down, safe and reliable
-  **High Current**
Rated current 200A, maximum current 250A

Four-button power control box (high current flip push button switch type)

XDL20-XCD-D3

-  **Waterproof level IP65**
-  **With Lock Latch**
Good performance to resist of vibration, waterproof and dustproof.
-  **Integrated design**
Exquisite appearance and convenient operation
-  **Flip Push Button Switch**
Push button operation to control Tail plate flipping to prevent mis-operation
-  **High Current**
Rated current 200A, maximum current 250A

Three-button power control box (stainless steel panel type)

XDL20-XCD-3S

Waterproof level

IP65

Stainless steel panel

Good corrosion resistance, suitable for various environments

Integrated design

Exquisite appearance and convenient operation

Slim Size

Small size, more convenient to integrate into the power unit panel

Three-button power control box (stainless steel panel voice prompt type)

XDL20-XCD-Y3S

Waterproof level

IP65

Stainless steel panel

Good corrosion resistance, suitable for various environments

Integrated design

Exquisite appearance and convenient operation

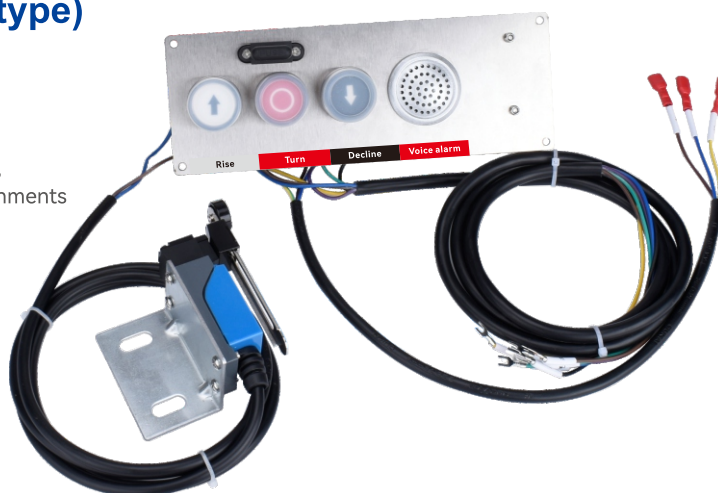

Slim Size

Small size, more convenient to integrate into the power unit panel

Voice Prompt

Equipped with voice speakers, customizable broadcast content

Transparent cover

Three-button power control box (mini type)

XDL20-XCD-3M

Waterproof level

IP65

With Lock Latch

Good performance to resist of vibration, waterproof and dustproof.

Integrated design

Exquisite appearance and convenient operation

Slim Size

Small size, more convenient to integrate into the power unit panel

Three-button power control box

XDL20-XCD-D31
Power control box +2-button **mechanical** handle control switch

Four-button power control box

XDL20-XCD-D41
Power control box +2-button **mechanical** handle control switch

XDL20-XCD-D31
Power control box +3-button **mechanical** handle control switch

XDL20-XCD-D41
Power control box +3-button **mechanical** handle control switch

XDL20-XCD-D32
Power control box +3-button **electronic** handle control switch

XDL20-XCD-D42
Power control box +4-button **electronic** handle control switch

XDL20-XCD-D33
Power control box +3-button **wireless remote** control switch

XDL20-XCD-D43
Power control box +4-button **wireless remote** control switch

XDL20-XCD-D35
Power control box + **electronic** handle control switch
+ **wireless remote** control switch

XDL20-XCD-D45
Power control box + **electronic** handle control switch
+ **wireless remote** control switch

*Note: The three -button power control box can be equipped with a 2-button or 3-button handle, while the four-button control box can be equipped with a 2, 3 or 4-button handle.
