1800	Prime Power	450	400
1800	Standby Power	495	440

· The engine per formance is as per GB/T2820
· Ratings are based on GB/T1147.1.

• Prime Power :

There is no time limit in the case of variable load operation. In any 250hours of continuous operation period,the variable load of average work load less than 80% of the prime power.
The operation time in the situation of 100%prime power no more than 500 hours. Permit 10%overload running 1hours in any 12 hours of continuous operation period.
The overload 10% power running time of every year no more than 25 hours.

• Standby Power :

The annual total standby power load should be less than 80% and the average running time shall be less than 200 hours. Among them the standby power point should be no more than 25 hours a year.
