

Mammoth-MS

HOSE SIZE
80M 3/8

Mammoth series

MS3030

Pressure:
4350psi-300bar
Water Flow:
20Lpm-8Gpm
Engine:
Honda GX690 (gasoline twin-cylinder engine).
High pressure pump:
German stainless steel high pressure pump (not made of brass).
Reducer:
automatic cooling system special material.
Remote control:
RS3 remote control.
Water valve:
Electromagnetic electric water valve.
Hose reel:
12V electric automatic hose reel.
High Pressure Hose:
80m FlexPro™ thermoplastic lightweight hose.
Dimensions:
Length 112cm Width 60cm Height 90cm
Weight:
210kg

range in open areas.

Nozzle Selection Guide

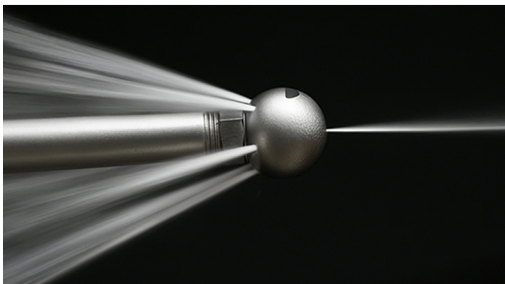

Skid Nozzle

Rear spray angle is small, with fewer jets for concentrated impact and strong penetration. Ideal for commercial pipes to flush out debris and grease smoothly.

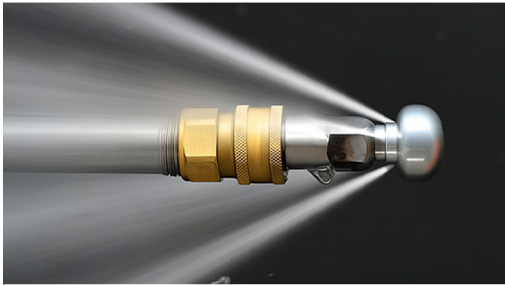

Root Cutting Nozzle

For removing roots and stubborn grease in residential main sewer lines.

Thumb Nozzle

One front jet and six rear jets. Rear jets have a very narrow angle, concentrating backward for maximum thrust. Ideal for long-distance pipe cleaning.

Mushroom Nozzle

Standard nozzle, ideal for clearing blockages in residential sewer lines.

Pro Low-Angle Jet Nozzle

Small rear spray angle with more water holes. Ideal for wide-area pipe flushing and long-distance hose pushing.

Water gun

for surface cleaning

AMJET provides radio-controlled sewer jetting systems and pipe cleaning tools, built to European standards for professionals.
