

JPNV-600 Digital Night Vision Binocular

Product profile:

JPNV-600 digital night vision binocular can be used normally during the day and night which has the functions of taking photos, video recording and playback. The observation range is infinite in low light and 500 meters in the dark. In the case of strong light during the day, the cover with the objective mask for observation will get a better visual effect. When observing at night, the objective mask must be taken off.

* Civilian, Not Military Grade, Not Military Device

Product features:

- Optical magnification is 5x, and digital magnification is 8x
- Equipped with infrared lighting, suitable for use in all dark environments
- Using a low illumination sensor
- The auxiliary light source can be turned on for about 3 hours

SPECIFICATIONS	
Type	JPNV-600
Optical Magnification	5X
Objective Lens Diameter	35mm
Field of View	8.5°
Diopter Adjustment Range	-0.5~+0.5
Low-Light Observation Distance(m)	2~∞
No-Light And All-Black Observation Distance(m)	2~500
Sensor	Low Illuminance HD 1/3 CMOS
Photo Shooting	500W
Video Recording	720P
Display Screen	3.5 inch LCD
Working Voltage	3.7V DC
External Battery	18650 Rechargeable Lithium Battery
Charge Power Supply	5.0V / 1000mA Adapter
Dimensions (mm)	210×145×75
Weight	550g
