LEAO® Interior Products

LEOA® interior board, high strength, impact resistance, is a multi-functional wall liner.

As high-performance, environmentally friendly and fireproof panels, our products can be used to create smooth and seamless walls that can be painted, wallpapered or tiled in a variety of designs.

Our panels are exceptionally strong and durable, making them perfect for humid areas such as kitchens, bathrooms and laundry rooms.

You can lay it underneath the stolen bricks or use it separately, such as corridors and passageways with large crowds, to exert its excellent impact resistance.

Features and Advantages of LEOA® Board:

- Very durable for indoor, suitable for wet areas such as bathrooms and laundry
- Create walls suitable for tiling, wallpapering and painting
- Reliable impact resistance and ideal wall lining for damaged
- Used in the interiors of commercial and residential buildings
- Resistant to fire, corrosion, and damage from moisture
- Fire Grade A material

Fireproof Wall Application

LEAO® Interior Groove Panel

LEAO® Groove Interior Panel, which is practical, strong, and beautiful, to make your building wall or ceiling look bumpy and never out of style. The surface of the product not only has vertical U-shaped or V-shaped grooves, but also is polished and has a smooth texture. It can be sprayed into any color you like, making your home look more design-oriented. Vertical lines can be used in both modern and traditional residential designs. As an interior wall panel, it is also suitable for areas where people often walk, such as corridors, game rooms, living rooms, bedrooms, and garages.

LEAO® Interior Groove Panel

The Characteristics and Advantages of LEAO® Interior Groove Panel:

- Fire-resistant, moisture-resistant, corrosion-resistant
- Installation is quick and convenient. The edge of the board has a tongue, which can hide the seam
