

UAV Swarm Integrated Load

Model Number: 1501001

The UAV swarm combat system has both reconnaissance, positioning and suppression jamming capabilities. After completing the remote deployment, it can quickly and autonomously complete the formation of a network. The reconnaissance and jamming integrated payloads can quickly carry out reconnaissance and positioning of the air defence weapon system.

Features:

- object: Air defence early warning radar, guidance radar
- Suppression/deception/combo jamming
- Salt spray resistant

Parameters	
Working Frequency Band	0.8-18Ghz
Maximum Reconnaissance jamming distance	≤ 80km
Airspace Range	-120°~ -60°, 60°~120°
Continuous Operating Time	≥ 30 mins
Weight	≤ 3.5kg
Dimensions	110*120*120(mm MAX)
Operating temperature	-40°C~+60°C
Storage temperature	-45°C~ +70°C
Relative humidity	≤95% (40°C)
