# ELEVATOR CABIN

Eco-Friendly Process: The material remains 100% recyclable, supporting green building initiatives.

## Pattern Etched Stainless Steel

1. Permanent Custom Designs: etched stainless steel features designs that are laser-engraved directly into the metal, ensuring they never peel, chip, or fade—even after decades of use in high-traffic areas.

2 Design Flexibility: Available with matte, brushed, or mirror-polished backgrounds, etched stainless steel complements any design style—from modern minimalist to industrial chic.
